SOLUTIONS FOR HEALTHCARE

Challenging Environments Furniture

teal

teal

At Teal, we believe thoughtfully designed environments can positively influence wellbeing, recovery and everyday experiences.

As a British manufacturer with decades of expertise in challenging environments, we design and manufacture high-quality furniture that balances safety, durability and contemporary design. Our products support the complex needs of settings, ranging from residential and dementia care to custodial and mental health environments.

We work closely with providers to help solve the everyday challenges faced by care and support teams, creating spaces that feel welcoming, therapeutic and built around the people who use them.

Our end-to-end manufacturing approach gives us complete control over quality, consistency and lead times, allowing us to deliver durable, design-led solutions that offer long-term value.

Through specialist expertise and thoughtful design, we help create environments that support recovery, enrich lives and improve outcomes.

Contents

Introduction	01 - 33

Complete Solutions Provider

We control every aspect of the process from product design, to manufacturing, logistics, installation and aftercare.

Lifecare Brand
Products for challenging environments and mental health

Therapeutic Environments
We help satisfy the rigours of clinical environments, promote patient dignity & contribute towards a therapeutic and healing patient environment

Design
We work alongside designers of international repute to deliver innovative, design led solutions

Innovative Products
Inspirational new collections for the modern healthcare facility

Bespoke Solutions
Tailoring products to meet your exact requirements

End-to-end Service
Major project delivery expertise; Including full Project Management for new build and refurbishment projects

UK Manufacturing
Products designed and manufactured in the UK at Teal's factory, tested to applicable standards

Delivery & Installation
Delivery using our own in-house fleet. Installation using a skilled, in-house experienced nationwide CSCS certified installation team

Sustainability
Strong sustainability credentials - all of our products are designed to be up to 100% recyclable

Aftercare & Support
Experienced Customer Service team with nationwide Service Support Team as part of our commitment to customer aftercare

Quality, Testing + Standards

We ensure quality at every stage of our process and are externally accredited to ISO 9001:2015. Our products are designed, manufactured, and installed to the highest levels of quality, durability and safety.

In compliance with our ISO:9001 accreditation we consider quality at every step of the process, and with over 1m sq. ft. of manufacturing space and 1,200 employees, we have the infrastructure and personnel in place to support this.

We have in-house design teams and we own the end-to-end manufacturing process.

We embed quality in every aspect of the process, including but not limited to:

- Use of High-Quality Materials
- Monitoring and Reporting the Quality of Goods
- Measuring Quality in our Supply Chain
- Measuring Quality in the Manufacturing Process
- Continuous improvement KPIs
- Quality Assurance checks throughout the process

Find out more about our Quality Control processes at **www.teal.co.uk**

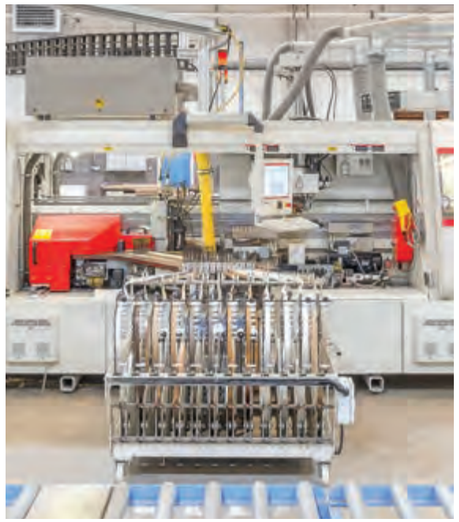

Design + Manufacture

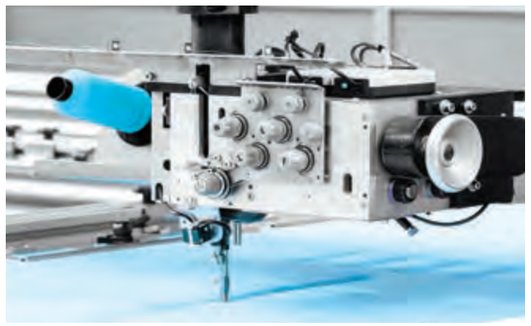

Based in Lancashire and with its own manufacturing and operations across multiple sites, Teal is the healthcare division of The Senator Group – the largest manufacturer of commercial furniture and workplace solutions in the UK and the leading investor in Research, Development and Design.

With facilities in Europe, the US and Middle East, Senator is a global brand. And even though Senator exports to over 70 countries, it remains an independent, family-owned business, controlling every aspect - from product design and innovation, to manufacturing, logistics, installation and aftercare.

A unique combination of state-of-the-art manufacturing technology together with traditional hand finishing expertise allows us to create beautifully crafted and detailed furniture and furnishing collections. As a true British manufacturer, we control every aspect of the process.

We design, we weld, we paint, we mould, we cut, we sew, ship and install.

Our Pledge to Net Zero

The Senator Group UK Manufacturing and Logistics commits to reducing absolute Scope 1 and 2 greenhouse gas emissions by 50% by 2030 and by 100% by 2040, from a 2019 baseline. We also commit to reducing Scope 3 GHG emissions to net zero by 2050.

We are proud to report that we have achieved a market-based reduction of 44.3% in Scope 1 and 2 emissions against our 2019 baseline*.

Our GHG inventory is third party verified annually.

*We have achieved a location-based reduction of 30.3% in scope 1 and 2.

Sustainable Partner to the NHS!

Teal is a sustainable partner to the NHS...

Our own sustainability strategy is closely aligned to the NHS journey to net zero and we can therefore assist NHS Trusts and Health Boards to minimise their own environmental impact through our sustainable products and services.

Ethics + Sustainability

Our ESG Strategy

Our ESG commitments are near term, measurable and scalable, to ensure we deliver a consistent approach across the whole Group.

We have 46 objectives which allow us to focus our efforts and hold us accountable in delivering our long-term targets.

Our ESG Strategy is compartmentalised into three areas:
Designing with Intent, Reducing our Impacts and Building Better Lives.

Designing with Intent	Reducing our Impacts	Building Better Lives
Responsible Design	Climate Action	Employee Inclusion & Wellbeing
Responsible Procurement	Waste Management	Community and Charity
Lifecycle Management	Wider Environmental Impacts	Protecting People in the Supply Chain

This structure steers us in reviewing the environmental and social impact of our products and operations and is supported by our strong governance structure. The following sections summarise the progress we are making against each of our objectives and allow us to be transparent in reporting our progress against each annually.

Our Progress Highlights

74%
of our suppliers are UK based.

Our company cars have seen a
40%
reduction in emissions over the baseline.

Our water reclamation system has reduced our freshwater consumption by 85%

85% of group waste was recycled.

All of our packaging is 100% recyclable.

Our commercial fleet has achieved a 19% saving in CO2 emissions since 2009.

We have revised our ESG strategy, introducing three focus areas;

Designing with intent
Reducing our Impacts
and
Building Better Lives

We funded and ran two successful carbon footprint workshops for 10 of our local suppliers, in partnership with the Chamber Low Carbon.

We established our first Charity and Community Committee.

We won: MEN business of the Year, Neocon Gold in Collaborative Furniture for the Adapt Wall, and BIBAs 'Manufacturer of the Year'

3% of energy consumed across our UK manufacturing sites was from our solar panels.

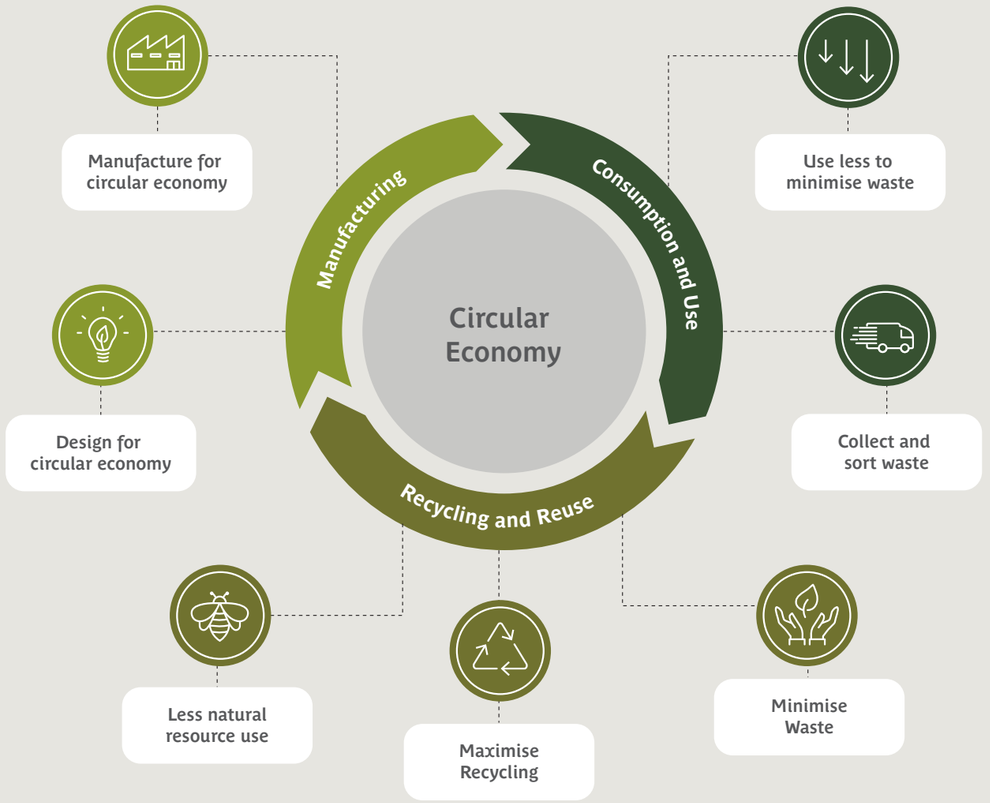

Through our combined efforts, we raised and donated over
£250,000
for our chosen charitable causes within the last two years.

We engaged almost
1,000
employees in our sustainability roadshow and generated over 150 sustainability Bright Ideas.

Visit **www.teal.co.uk** for more information.

Talking Recycling

The role of waste management in the circular economy

Waste minimisation and effective management is a key objective of our ESG strategy and the way we operate. Following the waste hierarchy, 'reduce, reuse, recycle' is a clear consumption mantra for the group. The emphasis is placed on reduction, be that energy, packaging and materials Our employees are committed to waste management, whether that be in our offices, canteen or on the shop floor.

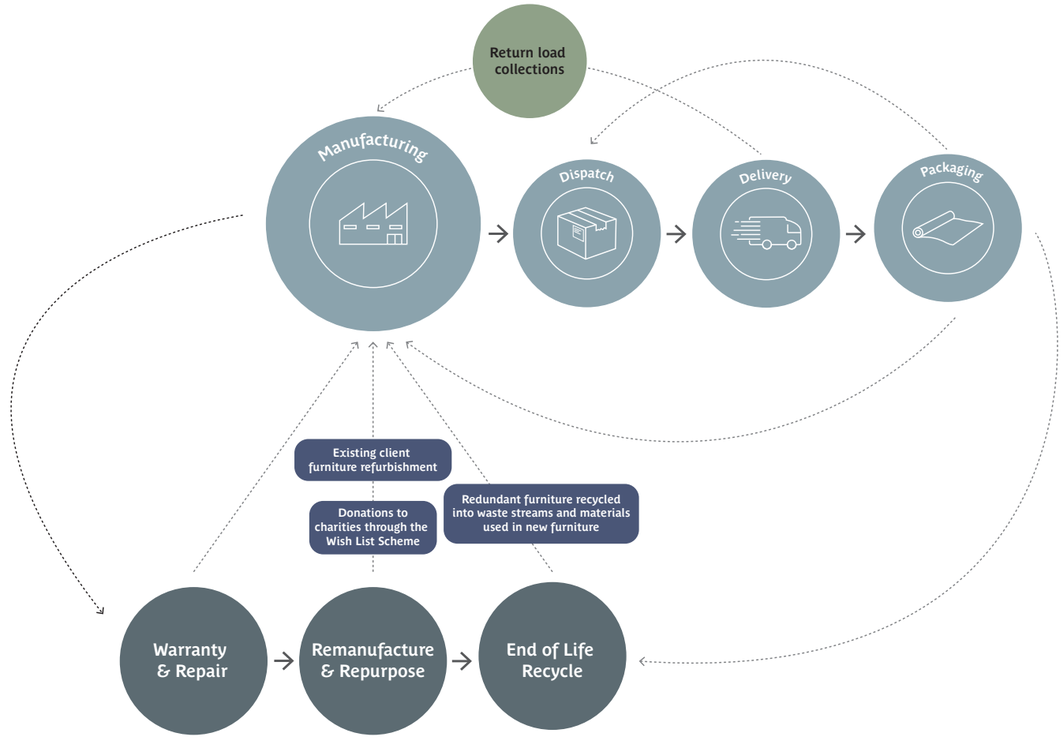

We regularly audit our waste management processes using our ISO 14001 management system to ensure best practice is being following and to continually improve our techniques.

Our packaging is 100% recyclable. We encourage recycling by utilising reverse logistics, back-loading our vehicles with post site installation packaging for processing at Sustain. Sustain offers a packaging recycling service which we call the White Bag Scheme.

This service is available for all to use, not just The Senator Group's clients, enabling everyone to responsibly recycle their packaging waste. The White Bag Scheme saw 627,750kg of packaging managed by Sustain last year. Much of our packaging is returned to us to use again, and last year we directly reused over 98,620 packaging items.

Back to Contents

Supporting a Closed Loop Circular Economy

We are working with our supply chain and waste contractors to understand opportunities to further pursue a circular economy model.

Manufacturing has a huge impact on our planet, and this is why we focus each year on how we can increase the circularity of our products, incorporating materials re-use throughout our design and manufacturing process. Our in-house Sustain recycling division is a unique benefit for us, enabling us to identify waste streams that can be reused within our supply chain.

Understanding the processing and onward journey of our waste enables us to highlight opportunities for these waste streams to be re-incorporated into our processes.
When we start to think of designing a new product, we consider recycled and recyclable materials wherever possible; with Sustain down the road from our factories, we can control every stage of a products life. From using fewer virgin materials right at the very start of production, to recycling and reusing our old products part by part at the very end. Ultimately this supports us in reducing our demand on raw materials and reduces the embodied carbon of our products.

Social + Value

The Senator Group are passionate about giving back to the communities in which we operate. To aid us in this, we have formed our own Charity & Community Committee.

Local Engagement

We delivered over 1,200 hours of local school engagement, working in partnership with schools in our local area to deliver a structured local school engagement plan which targeted students of all ages and backgrounds.

This involved a range of:

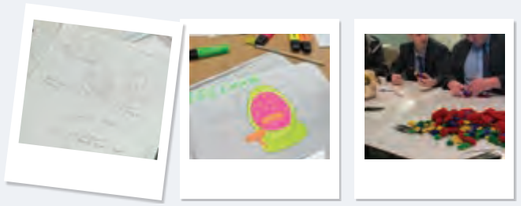

- School visits / Interactive sessions
- Careers fairs
- Mock interviews
- Workplace safaris
- Tree planting initiatives

St Bede's School
Case Study

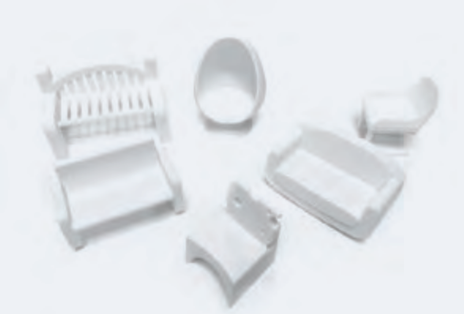

One such example is St Bede's, an 11-16 mixed Roman Catholic comprehensive school situated in Lancashire.

St Bede's approached Teal as a local business provider to help provide experience of the workplace for its Year 11 Design Technology and Textile students.

Design task with students

St Bede's Year 11 Design Technology and Textile students spent a day on site at our Head Office and manufacturing site in Lower Darwen, with activities planned throughout the day including design and lean manufacturing tasks.

3D printed models designed by students of St Bede's

Led by our Programme Co-ordinator and the Teal Design & Development team we outlined a product brief (a piece of outdoor furniture suitable for use within a mental health environment), encouraging creativity and outside the box thinking.
The final designs were 3D printed and illustrated in CAD.

Back to Contents

Tree planting

We joined forces with Ribble Rivers Trust to initiate a woodland planting project – we worked together over five days to plant a staggering 15,000 trees!

Season one of an ambitious two-phase planting project saw the planting of 15,000 trees across 30 acres of land.

Season two consisted of a further c.17,000 trees over 34 acres of land.

Charity engagement

We are experienced in delivering social value commitments, both as part of our contractual obligations and as part of our wider company ESG Commitments.

As a business we've raised an incredible **£250k** in the last 2 years for charities, most of which was delivered in Lancashire, driving social and economic benefits.

ROKU®
RENU

Roku Renu is made from what was.
Designed for what can be.

Crafted from 99% recycled materials and designed to be 99% recyclable at end of life, Renu represents a full-circle approach to design where nothing is wasted, everything has purpose, and renewal is built into every detail.

Created for spaces where people find renewal, progress and possibility. The furniture people live beside should reflect the same philosophy.

Shown with Panaz Nature, a soft plant based faux leather - 209 Wasabi

We called it Renu

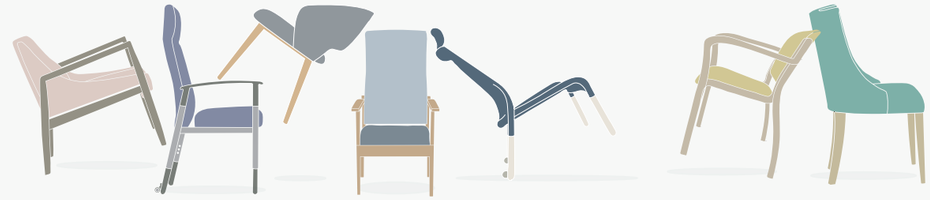

Made from over 99% recycled materials.

+ Roku Renu is created from a ground down polyethylene mix
+ Moulded products available in 99% recycled materials: Roku Tub chair, Roku table, Roku Keata, Roku Collective, Button moulded Table and Button Stool
+ At least 99% recyclable at end of life
+ Only available in black finish

Recycling Redundant Furniture

Don't let your old furniture sit around.
Teal offer a comprehensive removal and recycling service for redundant furniture.

We can collect your old furniture when we deliver new.

In 2009 we developed 'Sustain', our purpose-built 15,000ft2 recycling unit in Lancashire. The £1.5million facility represents a significant investment in our sustainability commitment.

Any furniture classed as redundant by customers is processed at our Sustain facility. All materials are separated, segregated and then recycled.

Discover our Medical Equipment & Healthcare Furniture Brochures online today at www.teal.co.uk!

Medical Equipment

A range of Medical Equipment designed for clinical settings, including hospitals, clinics and care homes.

Designed for demanding high traffic healthcare environments our ranges include sterilisation furniture, transport trolleys, shelving & storage, operating room furniture, height-adjustable stools, waste & linen management, examination & consultation equipment and Eolis® modular trolleys - fully customisable, with multiple options available to meet clinical needs.

Solutions for Healthcare

A range of premium quality Healthcare Furniture designed to meet the needs of infection control, tissue viability, manual handling, safety and comfort.

Seren Lodge

Perinatal Unit

A state-of-the-art specialist mental health facility has opened in the heart of Chester, helping to deliver support for perinatal mothers, babies and their families from across Cheshire, Merseyside and North Wales.

Seren Lodge, operated by Cheshire and Wirral Partnership NHS Foundation Trust is a new specialist eight bedded unit designed to provide compassionate care for pregnant and postnatal women who are experiencing severe mental ill-health.

The light and space within the single storey building supports calmness and relaxation, while specialist furniture provided by Teal contributes towards a therapeutic and healing environment for women experiencing maternal mental health difficulties.

Water Meadow View

Nestling within a 50-acre site that blends within the picturesque surrounding countryside lies Water Meadow View, a brand-new £32m mental health facility providing specialist support for adults with learning disabilities.

Designed by Gilling Dod Architects and operated by Lancashire & South Cumbria NHS Foundation Trust the 14-bedded unit in Whittingham, Preston benefits from specialist furniture for challenging environments, supplied throughout by Teal.

The furniture choice reflects current best practice in mental health furniture design, helping to create safe and appropriate spaces, while helping staff to deliver patient centred care that places the service user at the heart of the process.

Mossley Hill Hospital

Mental Health Facility, NHS

Consolidating services from across the city of Liverpool, a new inpatient unit has been built on the site of the old Mossley Hill Hospital, raising the standard of mental health care in the city and the wider Greater Merseyside region.

Commissioned by Mersey Care NHS Foundation Trust the modern, new, state-of-the-art mental health facility marks the end of traditional shared dormitory wards in the city, with single bedrooms and en-suite bathrooms to promote privacy and dignity.

Delivered by Graham Construction the new 80-bed facility features specialist mental health furniture supplied by Teal and represents a step-change in the provision of mental health in the region.

Humber Teaching

NHS Foundation Trust

A state-of-the-art in-patient facility has been unveiled in Hull, providing support for young people aged between 13 and 18 with severe and complex mental health issues.

Product + Features

Look for these symbols throughout the brochure for a quick and easy way to check product specification, features and options.

Plus+ One Piece upholstery option
Fully sealed upholstery to prevent concealment and for ease of cleaning

Difficult to pick up
Flowing design means many products have been designed to make them difficult to pick up, with rounded corners and smooth lines

Weighting options
Products are available with concealed weighting options to limit misuse, increase stability and to maximise safety. (Note: Medium weighting = +15kg, Heavy weighting = +30kg)

Security screws
Enhanced mental health (M) and Extreme environment (X) products are fitted with non-retractable security screws, no visible staples and no metal back tacking for added safety

Reduced Ligature
Products designed to minimise self-harm risks in mental health environments

Glide foot
Strong, sturdy solid wood rail. Full contact with floor ensures robustness

Piano hinges
Strong, durable hinges with reduced ligature risk

Lockable cabinet
Lockable storage for valuables & medication. Suiting option available

MFC construction
Robust core board, with a wide choice of wood effect finishes

MDF construction
Enhanced density core board provides additional weight and strength

Standard Specification
Robust framework without enhancement suitable for, environments up to low risk

Mental Health Specification
Constructed for use in environments up to medium risk. See next page for full details

Extreme Environment Specification
Constructed for use in environments up to high risk. See next page for full details

Seating + Specification

Our two challenging behaviour seating specification options are identified by the M and X symbols, and can be found throughout this brochure.

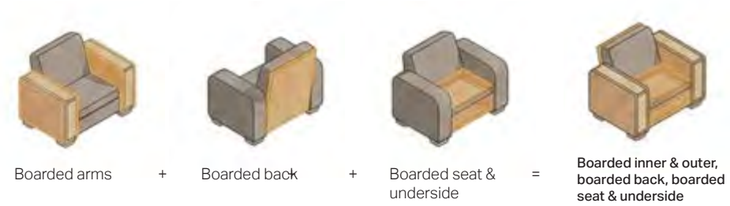

Mental Health Specification

Boarded seat platform and underside with non-retractable security fixings used throughout. Additional weighting options available.

Extreme Environment Specification

Fully boarded framework and underside with non-retractable security fixings throughout.
Additional weighting options available.

Suitable Environments

Low Risk
Suitable for reception, outpatient services, step-down & recovery.

Low To Medium Risk
Reinforced products for environments where enhanced robust specification is required*.

Low To High Risk
Weighted, reinforced products for environments where intentional throwing and furniture damage is likely to occur.

Low Risk

Low to Medium Risk

Low to High Risk

*Added weighting can make medium risk products suitable for a high risk environment. Please contact Teal for further details.

Fabric & Finish Options

Teal source contract fabrics from market leading manufacturers.

Durable and resistant to abrasion, a range of fabrics are available to meet the specific demands of challenging environments.

Many are stain resistant, waterproof and have anti-microbial, anti-fungal properties to help reduce the risk of healthcare associated infections.

Standard fabric colour swatches can be viewed at www.teal.co.uk
Fabric cards are available on request - please contact Teal customer services.

Testing and Standards:

All fabrics and vinyls pass BS5852 Ignition Source 5 or higher and BS7176 Medium Hazard.
Crib 7 options also available. All foams are Combustion Modified High Resilient fire retardant (CMHR).

Customer's own fabrics:

Teal can upholster in a customer's own material. Please contact Customer Services prior to placing an order.

Cleaning & Maintenance

Always follow the care and maintenance procedures specified by the fabric manufacturer.

For general guidance:

- Clean and care for the fabric on a regular basis to maintain condition and appearance
  Most stains can be removed by wiping clean
- Wipe clean regularly with a damp cloth to remove dust particles and light soiling
- Remove spillages promptly (within 15 minutes) with an absorbent dry cloth
- E cloths are recommended for general cleaning of upholstery
- Information for general guidance only
- Always refer to manufacturer's cleaning instructions for details specific to the chosen fabric

Wood Finish Options

Chair Wood Stains

Standard wood stain finishes available on all solid timber chair legs and frames. Our furniture is manufactured in solid Beech or laminated Beech and is available in clear lacquer or a number of stained finishes, with Medicote™ anti-bacterial lacquer.

Wood Stain Finishes:

Lancaster Oak (LA) | **White Oak** (HW) | **Natural Halifax Oak** (HN) | **Tobacco Oak** (HT) | **Natural Beech** (NB)

Flat Finishes:

White (WH) | **Cashmere** (CE) | **Cobble Grey** (CG) | **Cream** (CR) | **Duck Egg** (DE) | **Midnight Blue** (MN)

Stains can be matched to customer's own requirements. The original should be provided in this instance.

Cabinet Finishes

MFC furniture finishes and vinyl wrap available on 18mm MFC cabinet carcases, and as 18mm vinyl wrapped cabinets.

Wood Grain Finishes:

Lancaster Oak (LA) **LRV:** 27 | **White Oak** (HW) **LRV:** 48 | **Natural Halifax Oak** (HN) **LRV:** 35 | **Tobacco Oak** (HT) **LRV:** 21 | **Natural Beech** (NB) **LRV:** 46

Flat Finishes:

White (WH) **LRV:** 74 | **Cashmere** (CE) **LRV:** 50 | **Cobble Grey** (CG) **LRV:** 57 | **Cream** (CR) **LRV:** 81 | **Duck Egg** (DE) **LRV:** 30 | **Midnight Blue** (MN) **LRV:** 3

Colour Disclaimer: Printed images and digital images may appear differently to the final finish.

Fabric+Matrix

Teal source contract fabrics from market leading manufacturers.
Durable and resistant to abrasion, a range of fabrics are available to meet the specific demands of challenging environments. Many are stain resistant, waterproof and have anti-microbial, anti-fungal properties to help reduce the risk of healthcare associated infections.

Designed for the most demanding challenging environments, the Roku range delivers exceptional durability through seamless rotationally moulded construction and high-impact performance.

Its one-piece design removes seams and joins to support enhanced strength, reduced maintenance and improved infection control, while hollow internal sections allow additional weighting to help minimise movement within high-risk settings.

Multiple finish options available
see pages 30-33 for further information

Roku Family

Roku Family

In challenging environments, colour selection forms an important part of the wider environmental strategy, contributing to atmosphere, spatial orientation, and sensory experience.

The Roku palette has been developed to deliver a refined balance of calming tones, functional contrast and durable finishes, supporting environments that are both therapeutic and practical for everyday use.

Standard Features

- Smooth, high impact polyethylene, rotationally moulded for maximum durability

Roku Collective

The new Roku range offers a specification-led furniture system designed to bring greater flexibility, functionality and intention to modern healthcare and challenging environments.

Created to adapt at the point of design, Roku allows spaces to be shaped around the needs of the environment, whether through seating, integrated planting or storage.

Low to High Risk

Roku Organise

Roku Organise allows functionality to be integrated seamlessly into the environment while maintaining a clean, architectural appearance.

Designed as part of the wider Roku Collective system, the storage solution enables designers to create spaces that feel intentional, uncluttered and cohesive. Its seamless construction and multifunctional design approach support environments that prioritise both practicality and atmosphere.

Buddy Day Bed BDBU21 / Day Bed / Attendant Chair

Buddy is designed for relaxation and overnight stays. Suitable for environments such as Psychological Assesment areas.

L M H

Low to Medium Risk

Standard Features

- Stylish contemporary space saving design
- Easy operation
- Extends to 2m bed
- Fully open head area for clear visibility
- Storage boxes under seat for pillows & blankets, with protective cover
- In-line locking front castors. Swivel rear castors for manoeuvrability.
- Easy push button operation
- Reclines to any angle
- Maximum user weight: 160kg (25st)

Options

- Two width options: standard model and Buddy compact - where room size only permits a small footprint.
- Customise from a wide range of fabrics to enhance any space (see pages 32-33)

BDBU21 Buddy
Day Bed /
Attendant Chair

OW: 870
SW: 640

BDBU22 Buddy
Compact Day Bed /
Attendant Chair

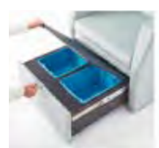

OW: 730
SW: 500

Buddy features easy push button operation, allowing the back to be lowered or raised. The continuous movement back can be stopped in any position for personalised comfort.

Stylish contemporary design and easy to operate, Buddy extends to a 2-metre bed, with fully open head area and storage compartment with protective cover for pillows, blankets and other accessories.

Christie

Flexible and eminently usable in a myriad of spaces, the Christie has a generous seat and curved supportive back making it a very popular range.

Jetson

Designed to support movement, self-regulation and comfort. It's gentle rocking motion provides calming sensory feedback, while it's soft upholstery and contemporary residential aesthetic allow Jetson to feel welcoming and non-clinical, while remaining practical for challenging environments.

Low to Medium Risk

Standard Features

- Gentle, calming rocking action for relieving tension
- Contemporary styling for the modern care facility
- Stops quickly on its own - 'comes to rest'
- Sturdy construction
- Difficult to pick up

Optional Features

- Wood finish options available (see page 31)

Code	Product	H	W	D	AH	SH	SW	SD	WT
RCJE21	Jetson Sensory Motion Armchair; Fixed Seat	1045	870	910	590	410	530	570	45

Jetson is a generously proportioned, comfortable, contemporary rocking chair suitable for use in low to medium risk areas.

RCJE21 Jetson
Sensory Motion Chair

"I work with many individuals who seek movement and this helps them in a variety of ways; to be more alert, to cope with feeling over alert, or to generally self soothe.

Jetson is a sturdy modern chair that has a linear motion and is solid enough to support adults with behaviour that can challenge or some gross motor difficulties such as heavy sitting. The linear movement can be calming for individuals and often they like to self-manage the rate and speed of motion. Jetson is ideal, as it is comfortable, supports transfers for those mobile enough to access it, yet is sturdy.

It does not look clinical, so would suit a multitude of environments. It is both a comfortable chair and a therapeutic tool within the environment".

- Lead Occupational Therapist working in Adult Learning Disabilities

Our Treatment Room collection brings together durable, healthcare grade solutions selected to support clinical practice within specialist mental health and challenging environments.

Multiple finish options available
see pages 30-33 for further information

Standard Features

- White powder coated steel finish
- Fixed upholstered panels
- Hydraulic lift powered by foot pump - press the pedal down to lift the couch, lift the pedal up to lower the couch
- Electric lift is operated using the handset
- All moving sections (headrest section on 2 section couches, headrest and footrest on 3 section couches) are operated hydraulically by pressing a steel handle on the back of the unit. This allows controlled movement up and down. There is an override function also which allows the back to be lifted without use of the handle. By pushing the panel from the back.
- Bariatric 2 section models have an electric backrest.
- 3 Section Bariatric models have electric backrest and hydraulic footrest
- The backrest and footrest angles from -30° to +80° (footrest angles only on 3 section model)
- Clearance of 150mm for hoist access
- Castors for ease of movement, pedal controls to lift up castors and hold the couch stationary
- One levelling foot on the couch to allow adjustment on uneven flooring
- Standard models (2 & 3 Section) have a safe working load of 250Kg.
- Bariatric models (2 & 3 section) have a safe working load of 320Kg
- Breather hole models available

Optional Features

- Customise from a wide range of fabrics to enhance any space
- Paper roll holder

Glide Stools

Glide is a multi-purpose gas lift stool collection which combines freedom of movement with multiple configuration options, helping to create the optimum seating position for healthcare professionals in a variety of settings.

Low Risk

Standard Features

- Comprehensive model options provide comfort and support during prolonged periods of seated work
- Simple to operate height adjustment - via ring mechanism mounted on underside of seat
- Seat options: Upholstered seat or durable PU. Available in a wide range of upholstery options and colours (see pages 30-31)
- Durable 5-star base (black only)
- Choice of castors
- Maximum user weight: 110kg (18st)

Optional Features

- **Castors;**
  Hard or soft wheel castor options available.
  Hard wheel castors are suitable for carpeted areas, soft wheel castors for hard floor surfaces.

  Choose from the following options:
  - Standard castors with no brakes
  - Brake loaded castors - castors brake under the additional weight of a user. Without a user castors are free moving
  - Brake unloaded castors - castors are braked without a user. When a user sits on the stool brakes are released, castors are free moving

Finish options

- Upholstered seat models: Available in a wide range of upholstery options and colours (see pages 30-31)
- PU seat black only
- Draughtsman stool - chrome ring only

With a hand operated rise mechanism and upholstered or PU seats Glide is available with round stool, ergonomic saddle and draughtsman options. Castor options are available to suit user preference and for carpeted or hard floor surfaces.

This collection combines robust construction, contemporary styling and flexible configurations across dining and communal settings.
From high-spec weighted tables and secure fixing options to supportive seating and wheelchair-friendly designs, each range has been developed to support safer, more welcoming environments.

Multiple finish options available
see pages 30-33 for further information

Dining+ Coffee Tables

Coast Dining & Coffee Tables

Combining bold contemporary styling with a strong architectural form, Coast features concealed security fixings, reinforced braced leg sections and mortise and tenon joints for long-term strength and stability.

Standard Features

- Tough, durable 36mm laminate top with 47-degree edge reference
- Soft radiused corners for added safety
- Easy clean, scratch and heat resistant laminate top
- Interlocking triangular legs secure into the base frame and top frame for added strength
- Solid, 70mm x 70mm beech underframe
- Bolted table-top with concealed security fixings for added safety

Optional Features

- Wood finish options available (see page 31)

The distinctive underframe takes centre stage on Coast. Details such as interlocking triangular leg shapes and table-top with discreet 47-degree edge detail elevate this range.

Cove Dining Chair

Every detail has been carefully engineered to support secure environments.

DCCO01X Cove
Dining Armchair
with Short Seat

DCCO02X Cove
Dining Armchair
with Deep Seat

The fully upholstered back enhances comfort, while the zero-depth seam seat design reduces concealment opportunities and maintains a clean, uninterrupted silhouette.

Designed with a fully upholstered form, seamless detailing and a distinctive rounded skid-base frame, Cove moves away from the institutional feel traditionally associated with secure furniture and creates spaces that feel warmer and more human.

Myla

Myla Bed is a secure, extremely durable solution designed to support safer interaction within challenging environments, with flexible fixing and sizing options to suit a wide range of room layouts.

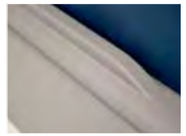

Low to High Risk

Standard Features

- Durable MDF vinyl wrapped construction
- 22mm soft edge top
- Channelled platform allows easy cleaning and air to circulate under the mattress
- Sloping sides; enables easy staff access for cleaning or assisting a service user. Aids sit-to stand movement.
- Waterfall edging around platform/base prevents fluid ingress and improves cleaning
- Internal support sections provide enhanced strength
- Mattress retainers

Optional Features

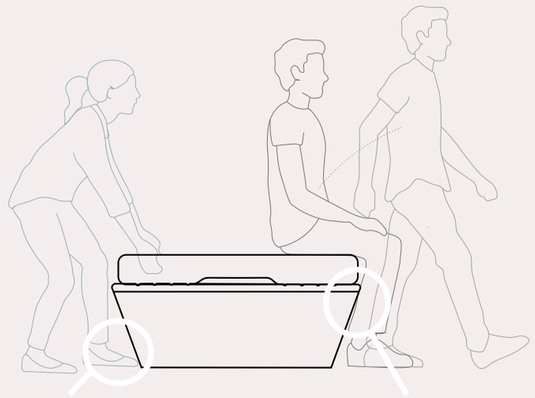

- Laminate & Vinyl finish options available (See page 31)
- Wall fixing options; centrally wall fixed, left or right wall handed to suit rooms layouts

Sloping Sides

Aids staff access

Aids sit-to-stand movement

- Unique design aids infection control, while also reducing manual handling issues
- Sloping sides enable staff to work closer to the bed and service users to get out of bed much more easily

X-Specification with rounded corners and no gaps or sharp edges
