DCWA01 WALDORF

Our elegant, generously proportioned Waldorf dining range evokes a feeling of grandeur and fine dining.

- Traditional dining chair range with upholstered seat and upholstered
- Solid beech frame, mortise and tenon construction for added strength
- Medicote anti-bacterial lacquer

PRODUCT SUMMARY

Scope of Assessment:

From extraction of raw materials through to production of the final furniture unit (cradle to gate). See page 2 for more details.

Data Used:

All secondary data was obtained from the See website for warranty information. Ecolnvent database. used in conjunction with SimaPro 7.3.2, using European data

Functional Unit:

Primary data was used wherever possible A Seating solution designed and including for energy use during the core manufactured for a useful life of approx 10

MATERIAL DECLARATION

Material	Amount (kg)Total (%)		
Fabric	0.50	5.75	Glo
Foam	0.50	5.75	Red
Solid wood	6.00	68.97	Tot
Plywood	0.10	1.15	Re
Chipboard	1.50	17.24	
Steel	0.10	1.15	

ENVIRONMENTAL SUMMARY

5.75	Global Warming Potential (Kg Co2 Eq):	19.84
5.75	Recycled Content (% By Weight):	11.15
8.97	Total Energy Consumption (Mj):	604.47
1.15	Recyclability (% By Weight):	99.00

Date of Production: October 2019

This Environmental Product Analysis has been created in accordance with, and following the principles of ISO14025 and ISO14044. All the Life Cycle Analysis data has been compiled, processed and verified by Oakdene Hollins Ltd.

Verification of LCA and environmental

data performed by Dr. Adrian Chapman

Compilation and processing of LCA data performed by Dr. Dan Skinner (Oakdene Hollins Ltd.)

(Oakdene Hollins Ltd.)

Group's plants and the energy resources used during product assembly/packing/loading and **ENVIRONMENTAL PRODUCT ANALYSIS** transport.

UPSTREAM The upstream module of the product's

life-cycle includes the extraction and treatment of raw materials, transport of the new material to the component suppliers and the manufacture of usable components from those materials.

THE THREE R'S

Senator is committed to continually improving the sustainability of all environmental aspects within our business. To meet both international standards and our own environmental targets we apply the three R's principle-

REDUCE, REUSE AND RECYCLE.

Whilst recycling is the element which receives the most exposure it is actually the last option available and should never be the prime target in anyone's battle to reduce

It is our duty as individuals and as a company to initially attempt to Reduce usage. Then we should look to Reuse wherever possible and finally, only after these two processes have been exhausted, should we consider Recycling.

ASSESSMENT CONSIDERATIONS

The following necessary assumptions and considerations were made during the course of the Life-Cycle Analysis:

• Manufacture of the furniture components • The transport of all materials, factory in which the raw materials were processed, due to a lack of case-specific data.

was assumed to take place in the same components and finished products was assumed to be via 16-32t Euro 6 lorries.

• All LCA data was modelled using the IMPACT 2002+ (v2.06) method.
