healthcare.	Lana can be supplied to full 'healthcare' specification, lead time and minimum's apply.			
maintenance.	This fabric uses Aquaclean technology, full details on CARE GUIDE 'AQ' available by request.			
colour.	Samples on this card are a guide and in accordance with normal trade practice batch to batch variations may occur within commercial tolerances. Custom colours service available, minimum order may apply.			

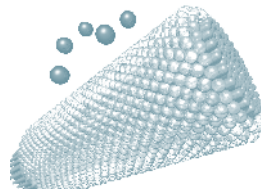

AQUACLEAN TECHNOLOGY ADVANCED UPHOLSTERY PROTECTION

The Aquaclean technology used in this upholstery fabric helps protect the fabric against the majority of spills and stains without having to resort to specialist cleaning.

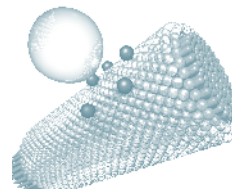

Aquaclean protects fabric from even the toughest stains, simply clean with water.

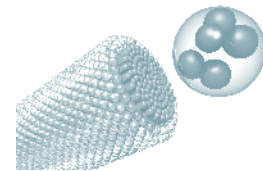

1. The Aquaclean treatment covers every single fibre with an invisible coating.

2. This ensures that dirt and stains are unable to penetrate into the fabric.

3. Stains can be wiped off and will disappear on application of water.

4. Simply remove with a clean cloth.

- Ideal for fixed upholstery, Aquaclean is 100% ecological, certified Oeko-Tex Standard 100.
- Aquaclean fabrics stay looking good for longer as it avoids the use of harsh cleaning agents which can damage fabrics over time.

Some of the toughest stains, even pen stains are easily removed.

Dampen with a clean cloth, rub the stain softly in a circular motion.

The stain will have disappeared when the cloth is removed.

To completely remove some tough, dried in stains water with a little neutral soap may be used.

Safe Front® - HYGIENE PROTECTOR

This fabric incorporates Safe Front®, an ecological and harmless protection system eliminating the presence of mites, fungi and bacteria. Safe Front® protective shield system incorporates silver technology and is totally ecological, innocuous and safe. The result is a totally hygienic, anti-allergic and sanitised upholstery fabric.
