A bit about our recliners

Made in the UK

One element which we consider key to our success is that we design and manufacture all recliners in the UK.

Testing and Standards

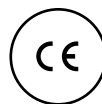

All recliners are made under comprehensive ISO9001:2015 procedures.

Our in-house Design & Development team utilise FIRA installed test equipment for strength, stability, durability and pressure management.

Products are designed to BS 8474:2013, certified to exceed relevant British & European Standards.

Fabrics are tested to BS5852 IS5, BS7176 Medium Hazard, all foams are Combustion Modified High Resilient fire retardant (CMHR).

CE Marked

Recliner mechanisms comply with relevant European health, safety and environmental protection legislation.

Aftercare and Support

Guaranteed

Recliners are rigorously tested at our in-house facility, designed to mimic the products in a typical healthcare environment. Recliner ranges incorporate an unrivalled seven year guarantee covering fabric, parts and labour and two years guarantee on mechanical parts and castors.

Visit www.teal.co.uk for full terms and conditions.

Comprehensive Servicing and Maintenance options

Regular maintenance will reduce long term costs and enhance the life of the recliner.

Planned preventative maintenance and unplanned maintenance options available, delivered by in-house service support engineers, nationwide. Options are available, including inspection and service, as well as breakdown/emergency visits.

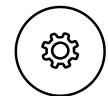

Service contract available where you see this icon

Choosing your recliner

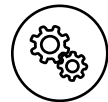

Operation

Manual
User operated two position recline function.

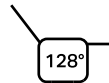

Single motor
Electric rise or electric rise and recline options. Backrest and footrest move simultaneously.

Dual motor
Allows footrest/backrest to be moved independently offering a wide variety of seated positions for real versatility. The angle between trunk/thighs can be varied.

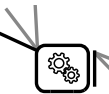

Technical

Recline angle
How far the chair will recline.

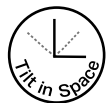

Riser
Rises to a near standing position to enable the user to get in and out of the chair easily.

Independent Motion
Dual motor allows backrest and footrest to move independently, for a wide variety of seated positions.

Trendelenburg
Positions the head below the feet, to relieve pressure and ease aching muscles and joints.

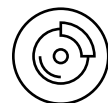

Tilt-in-Space
Backrest and seat maintain the same angle in relation to each other, allowing chair movement without changing the angle of key joints (neck, hips, knees, ankles). Particularly useful post-surgery.

Look for symbols throughout the brochure

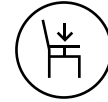

Features and Options

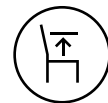

Maximum user weight
In kilograms and stones.

Braked castors
Ease of moving furniture with four braked castors.

Transfer arm option
Drop arm or removable transfer arm.

Removable seat option
Upholstered onto platform.

Pressure Relief
Pressure foam grade AA, BB or CC. See page 33 for full details.

Lithium Battery Pack Option
Rechargeable, approx. 200-300 charging cycles (depending on usage and operational conditions).

Bariatric option
Special sizes and weights available.

Service contract available
Where you see this icon.

Anti-pinch Leg Support Seat
One piece fabric increases comfort and leg support in all recline positions.

Black icon denotes standard feature.

Grey icon denotes option.

Astra Nova

Aesthetically designed, manual and electric recliner family with curved arm profile.

Environment:
Suitable for general ward use.
Wide comfort arm particularly suitable for maternity areas and care home localities.

Standard

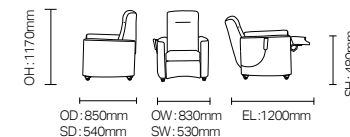

- Tilt-in-space functionality
- Comfort arms with curved profile
- One piece arm border - minimises number of seams for infection control
- Antimacassar head cushion
- Curved profile footrest (square footrest on REAN22/23)

User information

Position

Ensure the recliner is placed at least 900mm from a wall, heat source or other object to ensure the back is not obstructed when reclining.

For full user and operator instructions, see individual product user manual.

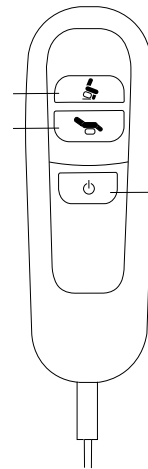

Handset

Single motor

Raises back, lowers footrest, raises chair

Lowers chair, opens footrest, lowers back

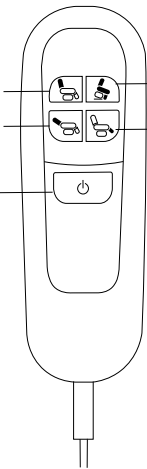

Dual Motor

Raises back

Lowers back

Power on/off

Raises back, lowers footrest, raises chair

Raises footrest

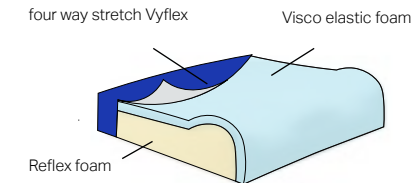

Pressure Management Options

Pressure Management

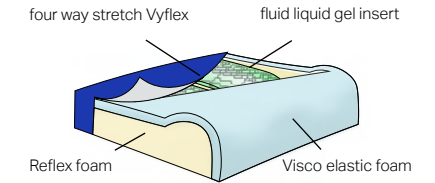

To meet the pressure management needs of a variety of client groups, Teal offer four seat grade options. All are available with multi-directional stretch upholstery.

Low Risk Comfort Cushion (AA)

Medium/High Risk Reflexion® Visco Foam (BB)

High Risk Gel Insert with Reflexion® Visco Foam (CC)

- 1. High grade polyurethane CMHR foam** (standard) - healthcare grade, suitable for very high use areas
- 2. Low risk comfort cushion (AA)** - Provides low risk pressure relief and support for clients with good posture and mobility
- 3. Medium/High risk Reflexion® Visco foam (BB)** - Reflexion® foam

- 4. High risk (CC)** - Reflexion® foam system with gel insert to provide high levels of pressure care.
