Finish Options

Wood Top Finishes:

Column & Base Finish

Colour Disclaimer: Printed images and digital images may appear differently to the final finish.

3 R's

Teal is committed to continually improving the sustainability of all environmental aspects within our business.

To meet both international standards and our own environmental targets we apply the three R's principle

Reduce, Reuse and Recycle.

Whilst recycling is the element which receives the most exposure it is actually the last option available and should never be the prime target in anyone's battle to reduce waste.

It is our duty as individuals and as a company to initially attempt to Reduce usage. Then we should look to Reuse wherever possible and finally, only after these two processes have been exhausted, should we consider Recycling.

Life cycle understanding

Waste elimination

Recycled content innovation

End of life solutions
