

SOLUTIONS FOR HEALTHCARE

Healthcare Furniture

teal

teal

At Teal we believe every environment should foster comfort, compassion and wellbeing.

As a British manufacturer, we responsibly design and craft progressive, high quality patient seating, ward and medical furniture for healthcare. The major provider of Ward and Residential Furniture to the NHS throughout the UK.

But the story doesn't end there. We provide furniture solutions that help to address many of the difficulties faced in the daily management of mental health services and other challenging environments.

And we offer a range of design-led furniture and turnkey solutions aimed specifically at the residential care market, helping to address the needs of clients with specific conditions including dementia and elderly care.

We help to create therapeutic, calming environments, which transform spaces, aid recovery, enrich lives and support the delivery of exceptional care.

Complete Solutions Provider

We control every aspect of the process from product design, to manufacturing, logistics, installation and aftercare.

Healthcare Brand
Patient seating, ward furniture and specialist products for healthcare. The major provider to the NHS in England & Wales

End-to-end Service
Major project delivery expertise; Including full Project Management for new build and refurbishment projects

Therapeutic Environments
We help satisfy the rigours of clinical environments, promote patient dignity & contribute towards a therapeutic and healing patient environment

UK Manufacturing
Products designed and manufactured in the UK at Teal's factory, tested to applicable standards

Design
We work alongside designers of international repute to deliver innovative, design led solutions

Delivery & Installation
Delivery using our own in-house fleet. Installation using a skilled, in-house experienced nationwide CSCS certified installation team

Innovative Products
Inspirational new collections for the modern healthcare facility

Sustainability
Strong sustainability credentials - all of our products are designed to be up to 100% recyclable

Bespoke Solutions
Tailoring products to meet your exact requirements

Aftercare & Support
Experienced Customer Service team with nationwide Service Support Team as part of our commitment to customer aftercare

Quality, Testing + Standards

We ensure quality at every stage of our process and are externally accredited to ISO 9001:2015. Our products are designed, manufactured, and installed to the highest levels of quality, durability and safety.

INDUSTRY LEADING WARRANTIES

All products carry a
7 year warranty

subject to standard
Terms & Conditions
(www.teal.co.uk
for details)

In compliance with our ISO:9001 accreditation we consider quality at every step of the process, and with over 1m sq. ft. of manufacturing space and 1,200 employees, we have the infrastructure and personnel in place to support this. All products come with a minimum 7-year warranty for normal wear and tear.

We have in-house design teams and we own the end-to-end manufacturing process.

We embed quality in every aspect of the process, including but not limited to:

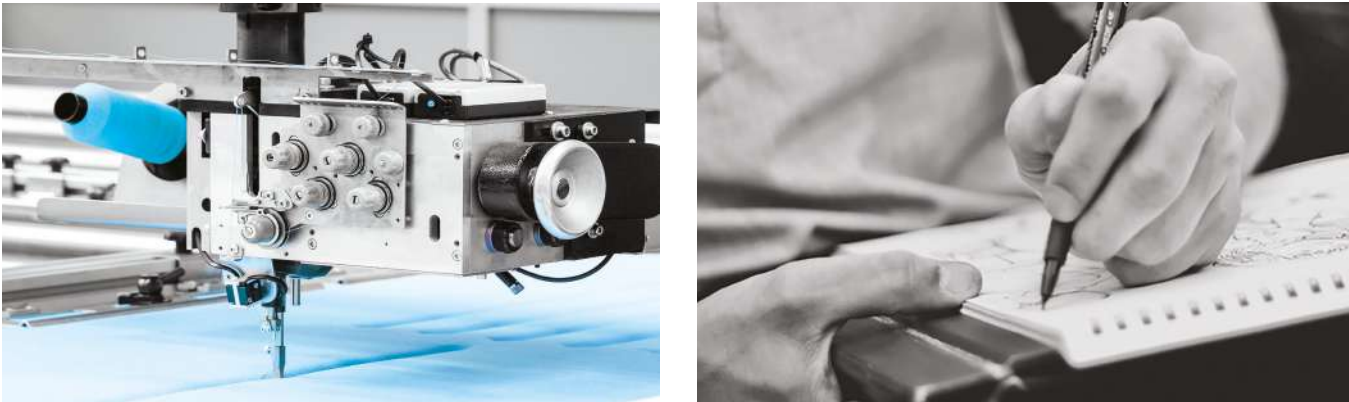

- Use of High-Quality Materials
- Monitoring and Reporting the Quality of Goods
- Measuring Quality in our Supply Chain
- Measuring Quality in the Manufacturing Process
- Continuous improvement KPIs
- Quality Assurance checks throughout the process

Find out more about our Quality Control processes at www.teal.co.uk

Design + Manufacture

Based in Lancashire and with its own manufacturing and operations across multiple sites, Teal is the healthcare division of The Senator Group – the largest manufacturer of commercial furniture and workplace solutions in the UK and the leading investor in Research, Development and Design.

With facilities in Europe, the US and Middle East, Senator is a global brand. And even though Senator exports to over 70 countries, it remains an independent, family-owned business, controlling every aspect - from product design and innovation, to manufacturing, logistics, installation and aftercare.

A unique combination of state-of-the-art manufacturing technology together with traditional hand finishing expertise allows us to create beautifully crafted and detailed furniture and furnishing collections. As a true British manufacturer, we control every aspect of the process.

We design, we weld, we paint, we mould, we cut, we sew, ship and install.

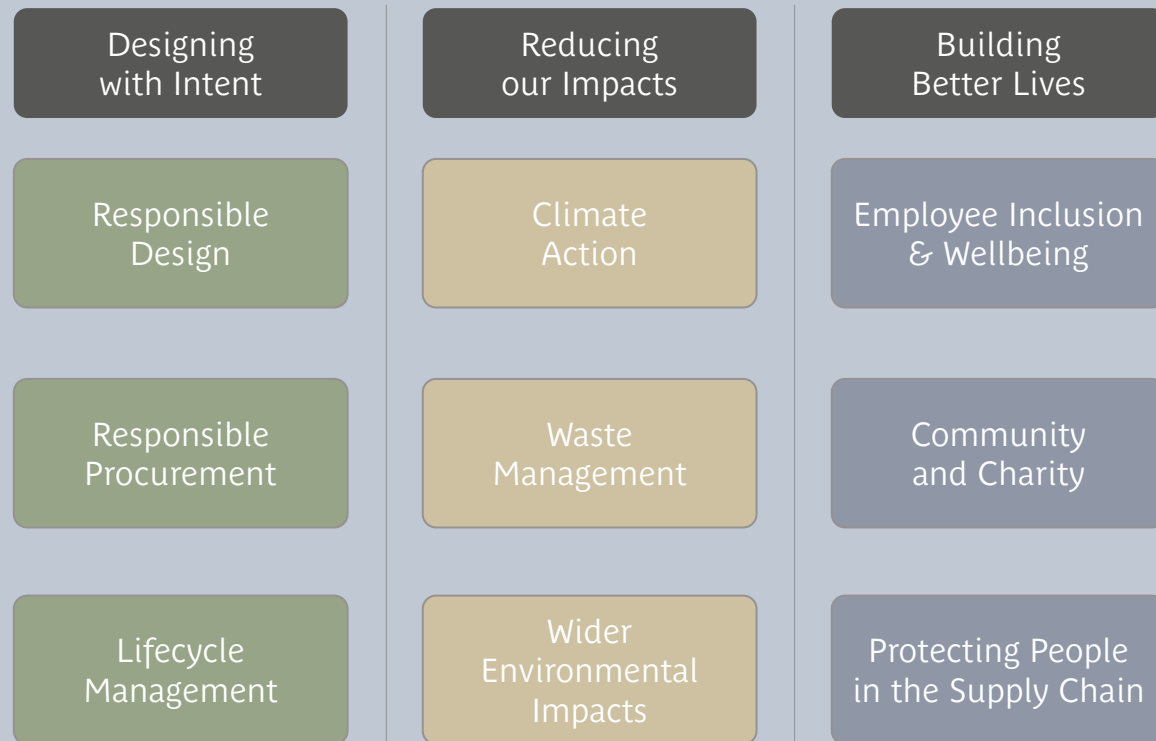

Ethics + Sustainability

Our ESG Strategy

Our ESG commitments are near term, measurable and scalable, to ensure we deliver a consistent approach across the whole Group.

We have 46 objectives which allow us to focus our efforts and hold us accountable in delivering our long-term targets.

Our ESG Strategy is compartmentalised into three areas: Designing with Intent, Reducing our Impacts and Building Better Lives.

This structure steers us in reviewing the environmental and social impact of our products and operations and is supported by our strong governance structure. The following sections summarise the progress we are making against each of our objectives and allow us to be transparent in reporting our progress against each annually.

Our Pledge to Net Zero

The Senator Group UK Manufacturing and Logistics commits to reducing absolute Scope 1 and 2 greenhouse gas emissions by **50% by 2030** and by **100%** by 2040, from a 2019 baseline. We also commit to reducing Scope 3 GHG emissions to net zero by 2050.

We are proud to report that we have achieved a market-based reduction of 44.3% in Scope 1 and 2 emissions against our 2019 baseline*.

Our GHG inventory is third party verified annually.

*We have achieved a location-based reduction of 30.3% in scope 1 and 2.

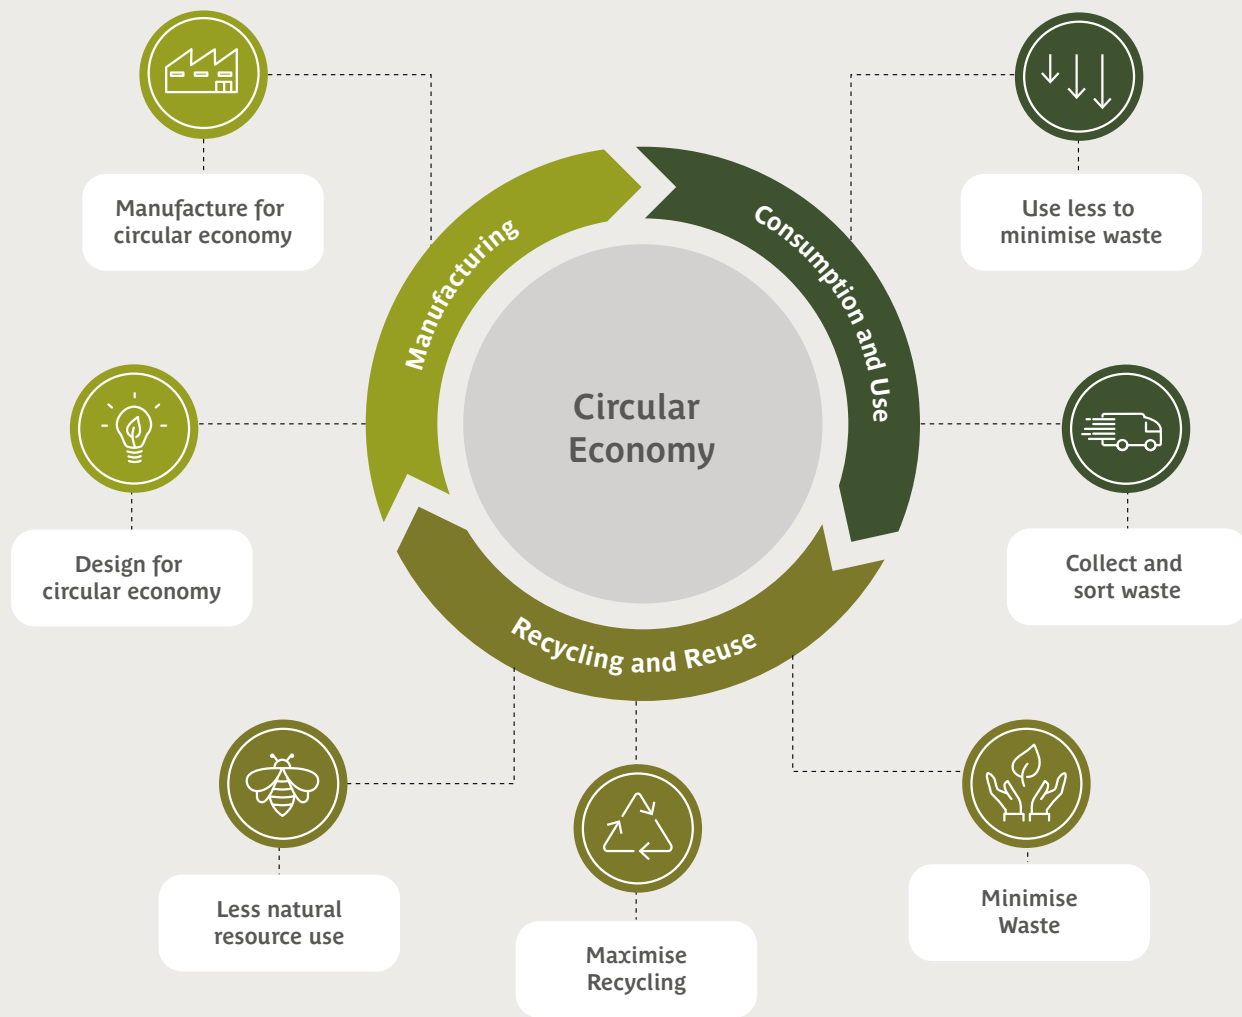

Sustainable Partner to the NHS!

Teal is a sustainable partner to the NHS...

Our own sustainability strategy is closely aligned to the NHS journey to net zero and we can therefore assist NHS Trusts and Health Boards to minimise their own environmental impact through our sustainable products and services.

Talking Recycling

The role of waste management in the circular economy

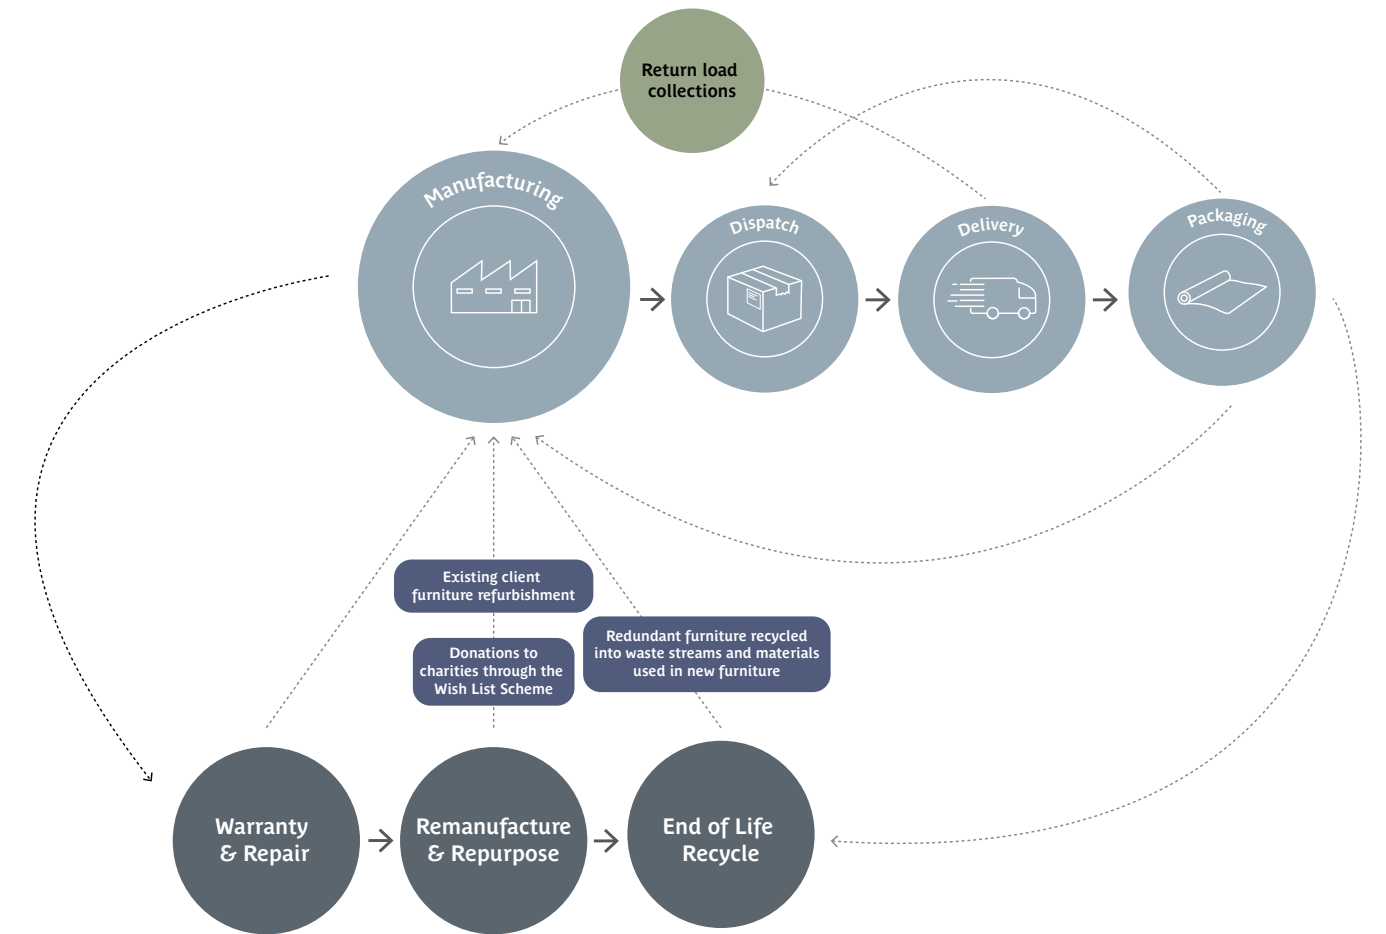

Waste minimisation and effective management is a key objective of our ESG strategy and the way we operate. Following the waste hierarchy, 'reduce, reuse, recycle' is a clear consumption mantra for the group. The emphasis is placed on reduction, be that energy, packaging and materials. Our employees are committed to waste management, whether that be in our offices, canteen or on the shop floor.

We regularly audit our waste management processes using our ISO 14001 management system to ensure best practice is being followed and to continually improve our techniques. In 2023, 87% of group operational waste was recycled.

Our packaging is 100% recyclable. We encourage recycling by utilising reverse logistics, back-loading our vehicles with post site installation packaging for processing at Sustain. Sustain offers a packaging recycling service which we call the White Bag Scheme.

This service is available for all to use, not just The Senator Group's clients, enabling everyone to responsibly recycle their packaging waste. The White Bag Scheme saw 627,750kg of packaging managed by Sustain in 2023. Much of our packaging is returned to us to use again, and last year we directly reused over 98,620 packaging items.

Supporting a Closed Loop Circular Economy

We are working with our supply chain and waste contractors to understand opportunities to further pursue a circular economy model.

Manufacturing has a huge impact on our planet, and this is why we focus each year on how we can increase the circularity of our products, incorporating materials re-use throughout our design and manufacturing process. Our in-house Sustain recycling division is a unique benefit for us, enabling us to identify waste streams that can be reused within our supply chain.

Understanding the processing and onward journey of our waste enables us to highlight opportunities for these waste streams to be re-incorporated into our processes. When we start to think of designing a new product, we consider recycled and recyclable materials wherever possible; with Sustain down the road from our factories, we can control every stage of a products life. From using fewer virgin materials right at the very start of production, to recycling and reusing our old products part by part at the very end. Ultimately this supports us in reducing our demand on raw materials and reduces the embodied carbon of our products.

Our Progress Highlights

74%
of our suppliers are
UK based.

Our company cars
have seen a
40%
reduction in emissions
over the baseline.

Our water reclamation
system has reduced
our freshwater
consumption by **85%**

85% of group
waste was
recycled.

All of our
packaging
was **100%**
recyclable.

Our commercial fleet
has achieved a 19%
saving in CO2
emissions since 2009.

We have revised our ESG strategy,
introducing three focus areas;

Designing with intent

Reducing our Impacts

and

Building Better Lives

We funded and ran two successful carbon footprint
workshops for 10 of our local suppliers,
in partnership with the Chamber Low Carbon.

We established our
first Charity and
Community Committee.

We won: **MEN business of
the Year**, **Neocon Gold** in
Collaborative Furniture for
the Adapt Wall, and **BIBAs**
'Manufacturer of the Year'

3% of energy consumed
across our UK
manufacturing sites was
from our solar panels.

Through our combined efforts,
we raised and donated over
£250,000
for our chosen charitable causes
within the last two years.

We engaged almost
1,000
employees in our
sustainability
roadshow and
generated over
150 sustainability
Bright Ideas.

Social + Value

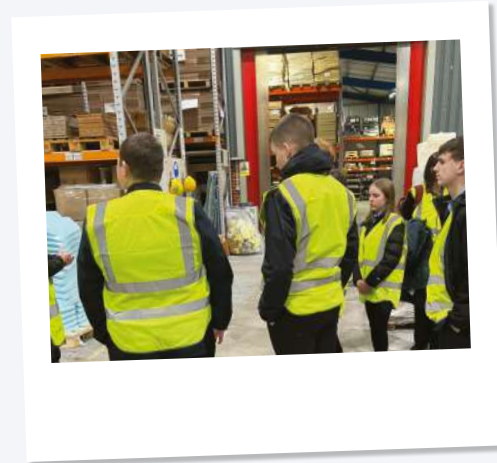

The Senator Group are passionate about giving back to the communities in which we operate. To aid us in this, we have formed our own Charity & Community Committee.

Local Engagement

We delivered over 1,200 hours of local school engagement, working in partnership with schools in our local area to deliver a structured local school engagement plan which targeted students of all ages and backgrounds.

This involved a range of:

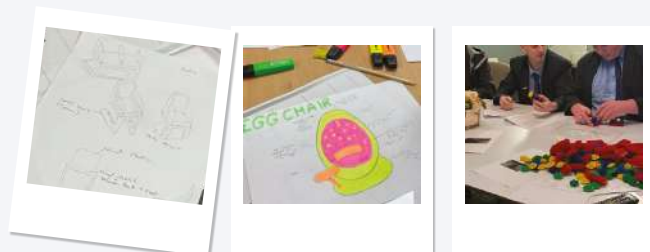

- School visits / Interactive sessions
- Careers fairs
- Mock interviews
- Workplace safaris
- Tree planting initiatives

St Bede's School Case Study

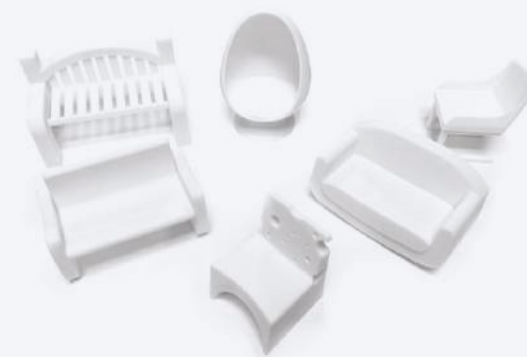

One such example is St Bede's, an 11-16 mixed Roman Catholic comprehensive school situated in the west of Blackburn.

St Bede's approached Teal as a local business provider to help provide experience of the workplace for its Year 11 Design Technology and Textile students.

Design task with students

St Bede's Year 11 Design Technology and Textile students spent a day on site at our Head Office and manufacturing site in Lower Darwen, with activities planned throughout the day including design and lean manufacturing tasks.

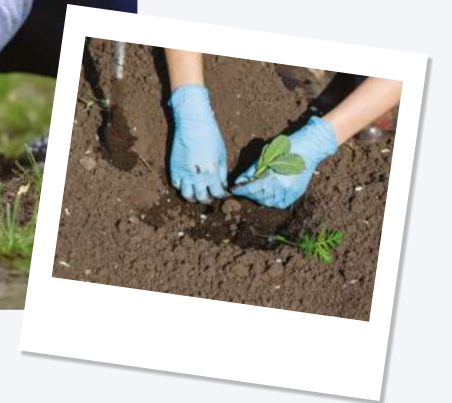

3D printed models designed by students of St Bede's

Led by our Programme Co-ordinator and the Teal Design & Development team we outlined a product brief (a piece of outdoor furniture suitable for use within a mental health environment), encouraging creativity and outside the box thinking. The final designs were 3D printed and illustrated in CAD.

[Back to contents](#)

Tree planting

We joined forces with Ribble Rivers Trust to initiate a woodland planting project – we worked together over five days to plant a staggering 15,000 trees!

Season one of an ambitious two-phase planting project saw the planting of 15,000 trees across 30 acres of land.

Season two consisted of a further c.17,000 trees over 34 acres of land.

Charity engagement

We are experienced in delivering social value commitments, both as part of our contractual obligations and as part of our wider company CSR offering.

We have an in-house Charity and Communities Committee consisting of 14 staff members. As a business we've raised an incredible **£250k** in the last 2 years for charities, most of which was delivered in Lancashire, driving social and economic benefits.

As a sustainable partner to the NHS our own sustainability strategy is closely aligned to the NHS journey to net zero and we can therefore assist NHS Trusts, Health Boards and private providers to minimise their own environmental impact through our sustainable products and services.

Shown with Panaz Nature, a soft plant based faux leather - 209 Wasabi

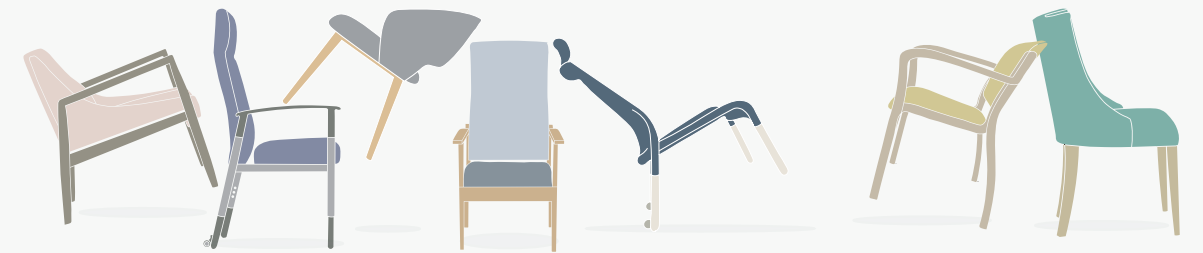

We called it RENU

Made from over 99% recycled materials.

- + ROKU® RENU is created from a ground down polyethylene mix
- + Moulded products available in 99% recycled materials: ROKU® Tub chair, ROKU® table, ROKU® Keata, Button moulded Table and Button Stool
- + At least 99% recyclable at end of life
- + Only available in black finish

Recycling Redundant Furniture

Don't let your old furniture sit around. Teal offer a comprehensive removal and recycling service for redundant furniture.

We can collect your old furniture when we deliver new.

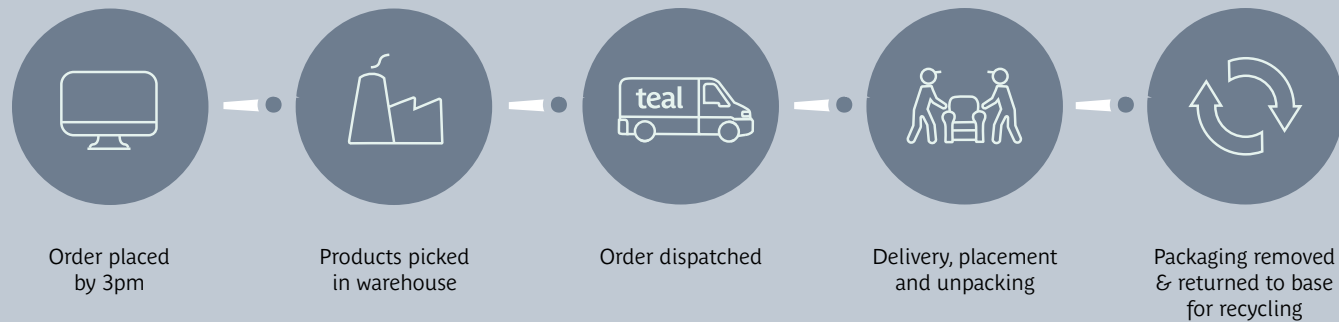

In 2009 we developed 'Sustain', our purpose-built 15,000ft² recycling unit in Lancashire. The £1.5million facility represents a significant investment in our sustainability commitment.

Any furniture classed as redundant by customers is processed at our Sustain facility. All materials are separated, segregated and then recycled.

Flexible, reliable, fast delivery service on an extensive range of best-selling healthcare furniture, in a select range of durable, healthcare appropriate fabrics.

Visit www.teal.co.uk to view the latest products available for QuickShip Express Delivery.

This includes delivery to a ground fl or room location. Products are unwrapped and packaging removed, ready to use.

Scan the QR code to see all available QuickShip products

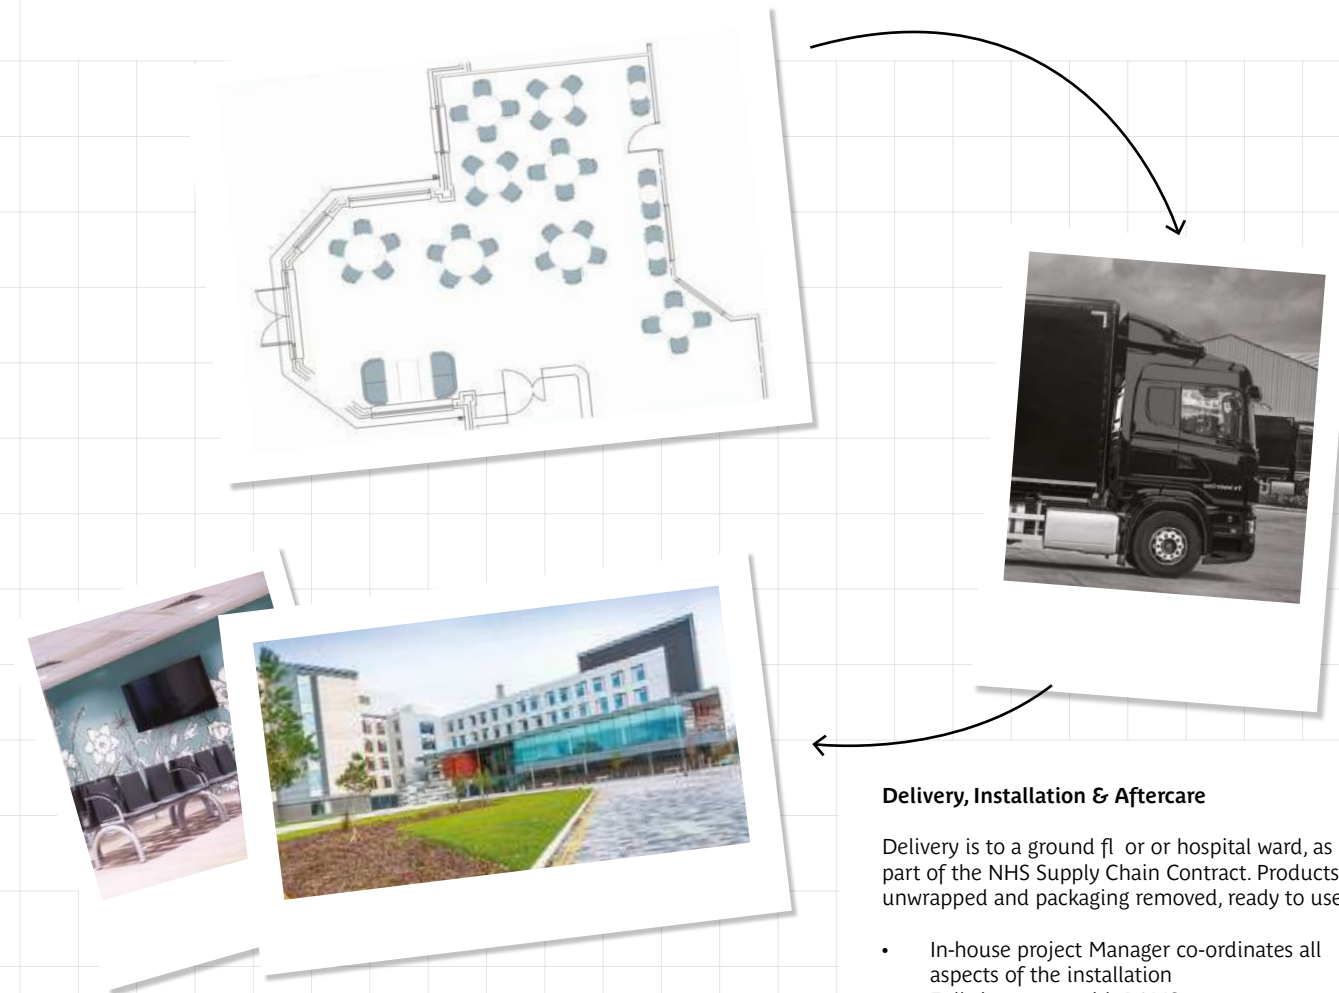

Only the products / fabrics shown on our website are eligible for Express Delivery (UK mainland).

Delivery + Installation

For specialist refurbishment or new build projects Teal bring together professional project management with qualified, experienced and skilled in-house installation teams to deliver complete, on-time and in budget.

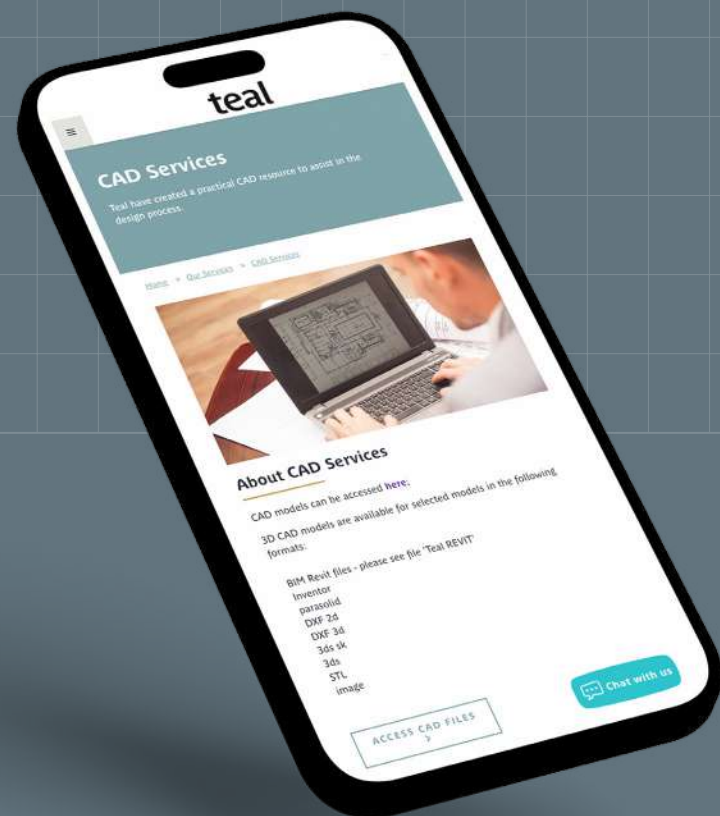

Delivery, Installation & Aftercare

Delivery is to a ground fl or hospital ward, as part of the NHS Supply Chain Contract. Products are unwrapped and packaging removed, ready to use.

- In-house project Manager co-ordinates all aspects of the installation
- Full site survey with RAMS
- Installation in line with ISO9001
- Employees CSCS & DBS approved
- Nationwide Service Support Team as part of our commitment to customer aftercare

Visit www.teal.co.uk for more information.

Teal have created a practical CAD resource to assist in the design process.

Please visit our website

to access all CAD models.
Available in 2D, 3D and Revit.

Discover our Medical Equipment & Solutions for Challenging Environments Brochures online today at www.teal.co.uk!

Medical Equipment

A range of Medical Equipment designed for clinical settings, including hospitals, clinics and care homes.

Designed for demanding high traffic healthcare environments our ranges include sterilisation furniture, transport trolleys, shelving & storage, operating room furniture, height-adjustable stools, waste & linen management, examination & consultation equipment and Eolis® modular trolleys - fully customisable, with multiple options available to meet clinical needs.

Solutions for Challenging Environments

Teal LifeCare furniture collections are designed to meet the specific requirements of a broad spectrum of challenging environments, ranging from high and medium secure forensic services through to rehabilitation, step down and special educational settings.

Working directly with key stakeholders within the Royal Liverpool Procurement Team and with NHS Shared Business Services Teal provided a selection of specialist healthcare furniture throughout the new 640-bed facility.

Charlotte

Cascade Plus

Astra

Products included 'Cascade Plus' – a bespoke extra-large bedside locker developed specifically for patients at the new Royal, providing easy, safe and secure care of patient valuables and medications. Staff and patients will also benefit from Teal's specialist patient seating and recliners, together with ergonomically designed and comfortable seating for bariatric care.

Teal Healthcare supplied its specialist furniture throughout the Grange University Hospital, a spectacular £350m hospital in Llanfrehfa, South Wales.

Part of Aneurin Bevan University Health Board's plan to restructure health care across Gwent, the hospital has been equipped with Teal's patient seating, waiting and atrium seating, specialist recliners and provision for relatives overnight stays with the inclusion of Buddy attendant chair / day beds and Moby sofa beds.

Southern Housing

St Peter's Hospital, Chertsey

Built over three floors, Nightingale Avenue offers the very best in keyworker accommodation, provided in self-contained 'cluster flats' designed for between 2 and 4 person occupancy, with communal kitchen / diner and en-suite rooms.

Built over three floors, Nightingale Avenue offers the very best in keyworker accommodation, provided in self-contained 'cluster flats' designed for between 2 and 4 person occupancy, with communal kitchen/diner and en-suite rooms.

It also offers 1 bed self contained flats. And with space for 132 occupants the stylish new homes incorporate key design features developed specifically for Southern Housing, including bespoke wardrobes, desks and shelving, as well as seating, window dressings, white goods, mirrors and accessories supplied and installed by Teal HealthCare.

The Southern Housing team chose Teal as a design partner on this landmark project following a competitive tender to provide full FF&E, including furniture and household items. Southern Housing were determined to offer a full 'step into home' service, and felt this could be achieved with Teal's best-in-class product and UK manufacturing expertise.

Teal successfully delivered a high quality and flexible living environment, supporting Southern Housing's design vision and 'enhancing lives' philosophy.

The overall design of the accommodation is contemporary, using modern materials and technology, perfectly suited to the large range of products and styles available from the Teal Key worker accommodation portfolio.

Furniture and decor work in-line with Southern Housing's 'Keyworker Design Statement' and colour choices, with a fresh colour palette and a mixture of modern seating, dining and bedroom spaces.

Teal worked alongside the appointed contractor 'United Living' and provided full project management, delivery and installation throughout this prestigious new build project.

NHS

Bassetlaw Hospital

Teal Healthcare has equipped a brand-new state-of-the-art facility at Bassetlaw Hospital with its specialist healthcare furniture, as part of the phased transition of urgent, acute, and paediatric services at the hospital.

The waiting area within the Emergency Department features Adeo beam seating, co-ordinating beautifully with the feature wall, with its eye-catching bespoke floral artwork helping to create a welcoming and uplifting experience. Adeo is particularly suited to high traffic waiting and outpatient areas with its comfortable soft PU seats and in-built anti-bacterial technology helping clinicians to maintain hygiene levels.

The complex is located directly in front of the Hospital's main entrance and delivers a more efficient patient flow throughout the hospital, helping to improve the patient experience, while also enhancing the environment for healthcare professionals in the delivery of care.

Designed to improve the patient environment the new facility is part of a drive to enhance healthcare services for communities across Bassetlaw and North Nottinghamshire.

The £7.6m contract to build a new Emergency Care Village for Doncaster and Bassetlaw Teaching Hospitals NHS Foundation Trust (DBTH) starts the transition of paediatric, urgent and acute services, ensuring that for the first time, all emergency assessment facilities are now in one place.

Following a comprehensive consultation process the scheme was designed with due consideration for comfort and neurodiversity, with construction partners, clinicians and the local community involved in years of careful planning.

The Hospital's Acute Medical Unit (AMU), Major and Resuscitation services within the Emergency Department (ED) and Children's Assessment Unit (CAU) have all moved into the new building. The new Children's Assessment Unit benefits from Teal's Astra Galaxy bedside recliners, ensuring family members can sit and relax comfortably next to their child's bed, while Affiniti bedside lockers ensure safe storage of medication and patient valuables.

Fabric+Matrix

Teal source contract fabrics from market leading manufacturers. Durable and resistant to abrasion, a range of fabrics are available to meet the specific demands of challenging environments. Many are stain resistant, waterproof and have anti-microbial, anti-fungal properties to help reduce the risk of healthcare associated infections.

Care & Maintenance of Healthcare Vinyl Upholsteries

Fabric selection

Teal offer a wide range of vinyl/faux leather and fabric upholsteries from all the leading fabric manufacturers which meet the required healthcare criteria.

General Care & Maintenance

Vacuum or wipe vinyl clean regularly and routinely with a microfibre cloth lightly dampened with cool water to remove dust and particles. Dry with a clean absorbent cloth.

Caution:

Steam cleaning:

Use in strict accordance with manufacturer's guidelines. Heat from steam cleaning disinfects but may permanently "cook in" protein stains.

Too much heat applied for too long may damage the PVC.

Antimicrobial Fogging:

Most vinyl will withstand occasional antimicrobial fogging. However, allowing residues to remain and accumulate on the vinyl surface may cause irritation to skin and long term damage to the upholstery.

Crocking:

Dyes and inks are intended to be indelible and will permanently mark fabric. Please note that all upholstery fabrics may be subjected to fabric crocking.

Crocking is the transfer of dye from one fabric to another. This may be caused by excess dye, improper dyeing methods or poor heat curing on jeans, trousers, dresses and skirts.

If crocking is noticed straight away, depending on the dye on the offending garment, crocking may be removed with mild alkali free soap and cold water. However, crocking sets if not immediately addressed. If crocking is a concern, select a mid or dark colourway for upholstery.

Vinyl

Vinyl and faux leathers are trusted for all areas of clinical care.

They combine:

- Robustness to cope with high traffic in busy healthcare environments.
- Flame retardancy treatments to retard flame where people come together to work or relax in numbers.
- Impervious nature keeps foams dry and clean.
- Antimicrobial protection renders the vinyl functionally active to inhibit the growth of hazardous microbes, creating an added layer of defence and prolonging the life of the vinyl
- Improved stain resistance allows more time to remove spillages and soiling to prevent staining.
- Ease of cleaning and resilience to infection control cleaning protocols and chemicals.

Spillages and Stains

Most spillages or stains can be simply wiped clean provided they are addressed promptly – within 15 minutes. Stains become harder to remove the longer they sit, particularly if subjected to body heat. Hot water can set protein-based stains, such as blood. It can cook proteins, causing them to bond with the vinyl surface. Therefore, it's essential to avoid hot water for these types of stains. Simply wipe the stain with an absorbent dry cloth and clean with a microfibre cloth lightly dampened with cool water.

Infection Control

Remove body fluids and extreme soiling immediately (within 15 minutes) with cold water. Apply approved infection control protocol: e.g., 5% sodium chlorite bleach solution, Haz Tabs, Chlor Clean, Tristel Fuse, etc. Remove chemical residue from vinyl surface and dry with a clean absorbent dry cloth.

Allowing cleaning product residues to accumulate on vinyl surface can create an irritant to skin and damage the upholstery. Wipe clean and remove surface residues routinely.

Wood Finish Options

Wood Grain Finishes:

Kendal Oak (KO)
LRV: 34

Lancaster Oak (LA)
LRV: 27

White Oak (HW)
LRV: 48

Natural Halifax Oak (HN)

Designing for Wellbeing & Dementia

Dementia affects all areas of life

It has both a physical and emotional impact. It invades mood, corrodes confidence and increases anxiety levels. Moreover, it affects vision, hearing, balance, special awareness, strength and orientation.

Thoughtful intuitive design can help to mitigate these perceptions and plays a crucial role in enhancing the lives of people affected by dementia and maximising independence by:

- Providing an environment which is accessible, safe, navigable by unobtrusively reducing risk, for example from falls, by careful considered circulation routes and furniture placement.
- Using familiar decorative accessories or furniture as “Memory Cues” in strategic locations to facilitate orientation and mobility.
- Using lighting; whether Ambient, Task or Accent, to mitigate poor vision and the confusion and anxiety it creates in people living with dementia.

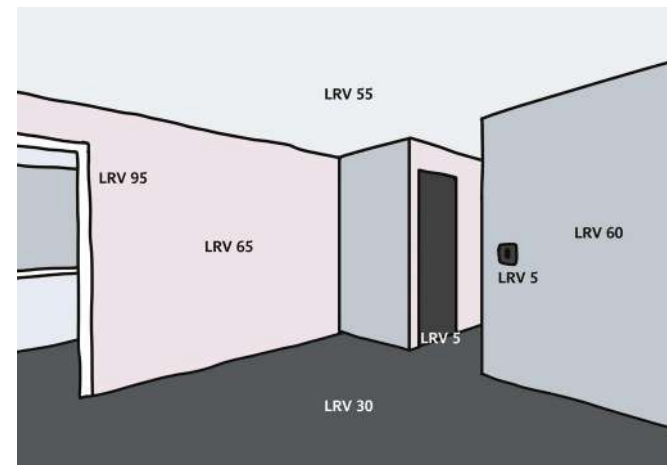

- Promoting natural light and avoiding blinds and window obstructions. Installing curtains to the very outer edge of windows to minimise light blocking.
- Using Light Reflective Values as a tool to establish contrasting differences of approximately 30 for colours on adjacent surfaces to aid visibility whilst creating a calm but attractive spaces.
- Using flooring design and colour to either encourage or discourage access to areas. Avoiding highly contrasting colours in irregular, busy or geometric patterns. Using plain materials to avoid confusion and textures to create interest and stimulation.
- Using some absorbent finishes such as upholsteries, curtains, textured wall coverings and some soft flooring to reduce noise and the resulting distress sudden, loud sounds can cause.

Designing for Dementia - Core Considerations

Teal focus on 4 core areas of concern when designing seating for elderly care and, specifically, people living with dementia:

- Access and mobility with emphasis on ease of sitting and raising to encourage mobility.
- Promoting best posture and its impact on wellbeing: alleviating neck and back pain, facilitating respiratory function, improving circulation and brain function, etc.
- Cleanability and infection control promoting a safe environment free of cross contamination.
- Visibility and Safety, offering large ranges of patterned, plain and textured upholsteries to enable the application of Light Reflective Values of 30.

The form and structure of seating for people living with dementia is much the same as for elderly in general.

Light Reflective Values (LRV)

Access, mobility & posture

Access and mobility

The impact of mobility limitation on health outcomes is well documented. Keeping active is important for everyone but particularly so for the elderly and those living with dementia. Regular physical activity has been associated with:

- Better cognitive function and reduced risk or speed of decline of dementia.
- Maintained blood flow to the brain, supporting neuroplasticity and reducing inflammation.
- Reduced risk of weakened muscle strength (Sarcopenia)

Encouraging and facilitating mobility is core to Teal design strategy, allowing as much movement and independence as possible. The inability to stand up from a chair aligns with the risk of falls and frailty. When seating is too low, the sit/stand transition is onerous. This not only makes standing more difficult, it can discourage mobility, cause anxiety and, as stated above, create a falls risk.

The design of seating is paramount. Seat heights, depths, form and features (such as head rest, arm shape and height) are all important.

When seating is too high and feet are not securely planted on the ground, supporting and distributing weight, then our posture and tissue viability is compromised. Teal offer a range of seat heights to provide flexibility and compromise between the demands of mobility and tissue viability.

Posture

Our spines change as we age. The vertebrae and discs that act as cushions between the bones of our back begin to break down and thin over time. The cartilage and connective tissues lose thickness and elasticity. Good posture can help minimise discomfort and pain.

Moreover, maintaining the correct upright posture (a neutral spine), improves blood flow to the brain, enhancing focus, memory, overall brain health and prevents digestive issues.

Proper posture is supported by good seating design with correct seat depth, arm heights, supportive chair backs and headrests.

The correct arm height in relation to seat height provides comfort and support and ensures that elbows too can assist in distributing weight and aiding posture. Furthermore, they are central to assisting standing. If arms are not at an appropriate height, the sitter relies on weakened hand muscles to pull themselves up. If the arm is suitably situated on the chair arm, the sitter can use both elbows and hands to leverage their weight. Essentially, the arms create a “push off” to standing position.

Comfort is further enhanced by appropriate cushion foams: such as comfort foam, BB medium-high risk and CC high risk foams to provide appropriate pressure distribution and comfort.

Cleanability & infection control

This is achieved by maximizing access to all areas of seating for cleaning. Upholsteries should be appropriate healthcare specific impervious fabrics which have recognized healthcare features.

Features include:

- Robustness and durable to cope with high traffic in busy healthcare environments.
- Flame retardancy treatments to retard flame and allow people time to exit the property.
- Water proofing to protect foam seat pads.
- Antimicrobial protection renders the fabric functionally active to inhibit the growth of hazardous microbes, creating an added layer of defence and prolonging the life of the fabric.
- Improved stain resistance allows more time to remove spillages and soiling to prevent staining.
- Ease of cleaning and resilience to infection control cleaning protocols and chemicals.

Safety and visibility, with assessment of fall risk

We lose the ability to see and differentiate colour as we age. Pale colours merge into porridge shades and medium tones of blues / purples / greens etc can read as grey. Hence, the degree of contrast between adjacent surfaces is an important aid for the visually impaired in distinguishing between surfaces.

For people without dementia or those who are partially sighted, lack of surface contrast is a major difficulty. However for people living with dementia, it is not only difficult but desperately confusing, creating unnecessary anxiety and depression.

Teal offer a huge range of plain and textured upholsteries to facilitate contrast, achieving 25-30 LRV differential to ensure that seating is visible to the partially sighted and discernible for people living with dementia.

Ergonomically designed patient seating ranges with all the comfort and functionality required for high intensity traffic in ward and departmental areas.

A range of standard and optional features focus on five major criteria of ward seating: infection control, tissue viability, manual handling, patient safety and comfort.

To suit patients' varying postural needs, options include seat height adjusters and removable 2 depth seat adjustment plus pressure distributing seat for a holistic approach to pressure management. In addition, housekeeping wheels assist manual handling.

Multiple vinyl / fabric upholstery options & colours available
see pages 30-31 for further information

Patient+ Seating

Tolero

Tolero PSTL02 high back chair with height adjustable legs

The Tolero metal patient chair demands attention by virtue of its slimline profile, contemporary form and a host of unrivalled features for infection control, tissue viability and manual handling, including: removable seat, Reflexion® high risk pressure distributing seat, housekeeping wheels and integral adjustable legs (PSTL02 / 03 / 05 / 06 models).

PSTL01 Tolero
High Back Chair

High Back Chair,
Integral Height Adjustable Legs

PSTL21 Tolero
Fixed Height Footstool

PSTL22 Tolero
Height Adjustable Footstool

PSTL23 Tolero
Height Adjustable Pedestal Footstool

Standard Features

- Strong, durable high grade steel frame creates a modern aesthetic
- Modern, slim profile with contoured back mimics curvature of spine for constant support
- Elegant moulded black plastic arms and extruded frame with integral anti-bacterial technology
- Removable depth adjustable seat (2 positions) for cleaning / access
- Easy clean polymer moulded seat base (removable seat only)

- Reflexion® BB medium / high risk pressure management seat
- Sacral gap as standard for cleaning/infection management
- Ergonomically positioned arms for easy sit to stand transition
- Integral housekeeping wheels as standard
- Resilient to commonly used healthcare cleaning systems
- Maximum user weight: 160kg (25st)
Bariatric user weight 320kg (50st)
- Black arms as standard (All models)

Options

- Frame finish options
- Fixed seat
- CC Gel seat (see page 60)
- Matching Tolero Beam & Bench seating available (See pages 128-131)
- Wide range of upholstery finishes (see pages 30-31)

Frame colour options:

- Stone
- Onyx
- Anthracite

Mobility is a fundamental aspect of patient care in nursing, crucial for both physical health and psychological Wellbeing.

Drop arm seating ensures patients can move safely and comfortably from a bed to a chair, or wheelchair.

The drop-arm chair has a full range of standard features and is available in both high and mid back.

Slim profiled back

Pressure care seat

Sacral gap

Tolero Standard Features

Removable Seat

Removable seat with polymer base facilitates cleaning and infection control.

Adjustable Seat Depth

Adjustable seat allows 2 depths ensuring support from the chair back without cutting off circulation at the knees.

Pressure Care Seat

Reflexion® BB medium / high risk pressure management seat. Standard on all models.

Reflexion® CC high risk pressure management seat option also available (see page 60).

Height Adjustable Legs (Model Specific)

A range of chair heights provide appropriate seating height and bring benefit to posture, circulation, balance on rising and core strength. Image shows minimum height. In 25mm increments.

Ergonomic slim profiled back

Slim profile with contoured moulded back mimics curvature of spine for constant support.

Easy Rise Arms

The ability to stand from a sitting position is key to maintaining mobility, independence, and is an important factor for patients.

Sacral Gap

Sacral gap for ease of cleaning and access.

Housekeeping Wheels

Housekeeping wheels facilitate manual handling. Housekeeping wheels standard on all models.

Tolero Options

Fabric & Finish Colour Options

Onyx, Anthracite & Stone finish options. Wide range of contact fabric options available.

Removable Seat Platform

Interchangeable seat platform allows safe use of prescribed bespoke or dynamic pressure cushion without slips or falls from existing cushion or changing seat height. (See page 61 for full details).

Replaceable Seat & Back

Replacement parts available for whole life costs. A sustainable solution that extends the product lifecycle.

Additional Model Options:

Bariatric Model Options

Maximum user weight 320kg (50st). (See page 66 for details).

Drop Arm Model Options

Drop arms allow for ease of patient transfer. (See page 40 for details).

Mid Back Model Options

Mid back models available (200mm lower than high back). (See pages 40 - 41 for details).

Matching Tolero Beam & Bench Seating available:

Beam Model Options

(See pages 128 - 129 for details).

Bench Model Options

(See pages 130 - 131 for details).

Manual Handling

Manual handling procedures seek to minimise the risk of injury from hazardous manual handling in the workplace, the root cause of more than a third of all workplace injuries with the following consequences:

Immediate Consequences:

- Broken bones from falls and dropping objects
- Pulled muscles from over exertion during lifting or moving tasks
- Sprains due to incorrect handling techniques
- Cuts, bruises and breaks from accidental collisions while handling patients and object

Long-Term Consequences:

- Repetitive Strain Injury – a chronic condition; the gradual and cumulative wear and tear to muscles, ligaments, tendons, joints, bursa and nerves caused by repetitive incorrect practices
- Potential degenerative conditions (for example Carpal Tunnel Syndrome) due to inadequate lifting / moving practices
- Reduced quality of life: dignity, wellbeing and mental health compromised during inaccurate and inappropriate handling tasks.

Manual handling incidents within diverse healthcare facilities have significant consequences for both staff and patients.

This impact is both human, as noted above, and financial; the cost to the NHS of patient handling related sickness, at a time when the NHS is trying to achieve major savings over £400 million each year.

Injury Risk:

Teal's design policy approaches manual handling from the perspective of both the patient and healthcare worker prioritising the needs and comfort of the end user with due consideration to their capabilities, strength and any limitations with consideration of:

- **Ergonomics Focus** on Posture and Tissue Viability: e.g., overall height, reach, arm height. Proper ergonomics allow patients to sit and rise with ease, promoting comfort and mobility.
- **Grip and Surfaces** with features such as:

1. Robust housekeeping wheels and castors with a smooth glide for easy mobility

2. Effective braking features – locks to prevent unintended movement when furniture is stationary

3. Removable or drop arms (to one or both sides) to aid patient transfer

4. Sleek, minimal design to avoid trip hazards

5. Clear load bearing – specified maximum weights

6. Easy rise arms

7. Easy clean surfaces resilient to infection control protocols

Features & Accessories

Removable Seat

- Upholstered onto rigid plastic platform
- Two seat depth adjustments
- Wipe down for hygiene control

Adjustable Seat Depth

- Adjustable seat allows 2 depths ensuring support from the chair back without cutting off circulation at the knees (standard on Aylesbury models, optional extra on other patient seating models).

Pressure Care Seat

- Reflexion® BB medium / high risk pressure management seat option. Standard on all Whittle bariatric models.

Reflexion® CC high risk pressure management seat option also available. (See page 60).

Height Adjustable Legs

- Leg adjustment of up to 100mm (added to lowest seat height offered).

HARW

- Seat height adjusters with housekeeping wheels. Height adjustment / improved mobility.

Height Options

- Standard seat height is 19" (480mm). All our patient seats can be specified with 16", 17", 18" fixed seat heights (405, 430, 460mm), except drop arm models (minimum 17").

Please contact Teal Customer Services to confirm requirements.

BC Braked Castors

- Fits most patient seating.

Housekeeping Wheels

- Housekeeping wheels facilitate manual handling. Fits most patient seating.

Perry

Perry 730 High back patient chair shown with Cascade BLCC21 Bedside locker and Perry 743 High back chair with drop arms

A durable seating range with a classic aesthetic and multiple options focused on patient wellbeing.

Salus

Salus PSSA02 High Back Armchair in Cappuccino with Sloping footstool PSSA03 in Regal Silver

Salus is an innovative, ergonomically designed patient chair, providing continuous postural support with Medipur™ anti-microbial surfaces. Designed by Tim Wallace.

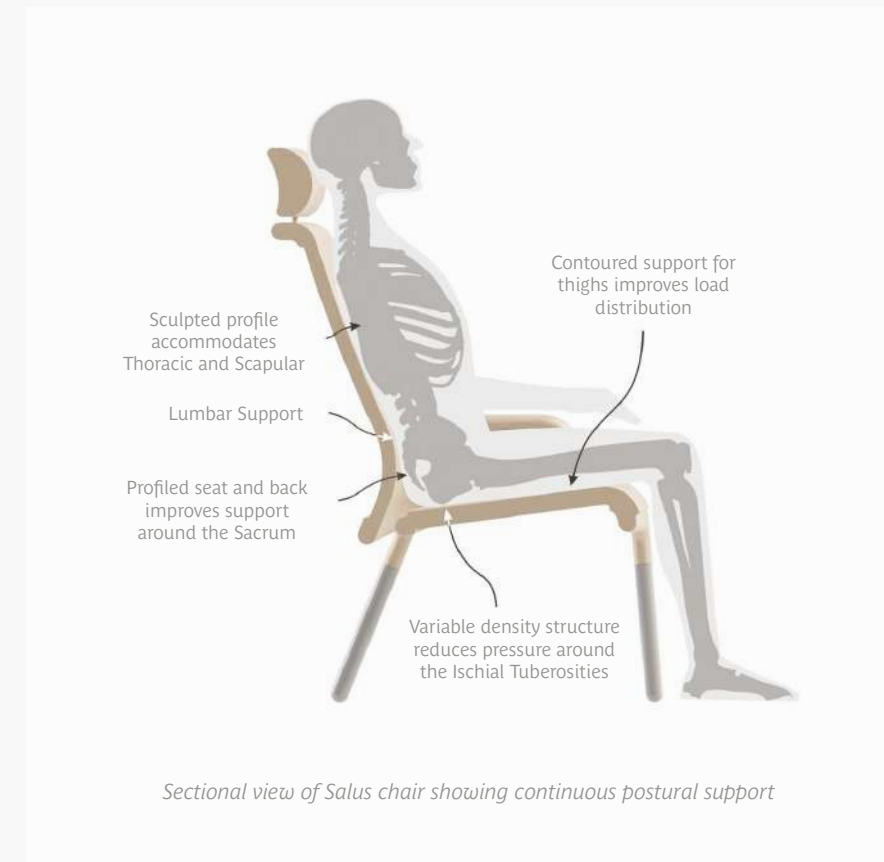

Standard Features

- Integral skin Medipur™ with soft compressible centre and an outer impermeable surface
- Housekeeping wheels as standard
- No stitching and smooth underside assist in infection control
- Contoured seat/back replicate the shape of the body, compressing to offer continuous postural support.
- Pressure relieving seat with sprung internal frame relieves pressure on the sacral area
- Maximum load 160kg (25st)
- Sloping footstool slides under the Salus chair

Options

- Height adjustable legs
- Sloping footstool (Regal Silver frame) Available in a range of contract vinyl options

Innovative, award winning, ergonomically designed patient chair.

PSSA01 Salus High Back Chair with Headrest

PSSA02 Salus High Back Armchair with Headrest

PSSA03 Salus Sloping Footstool available in a range of contract vinyl options.

Soft compressible seat

Chair Colour Options:

- Navy
- Blue
- Cappuccino

Frame Colour Option:

- Regal Silver

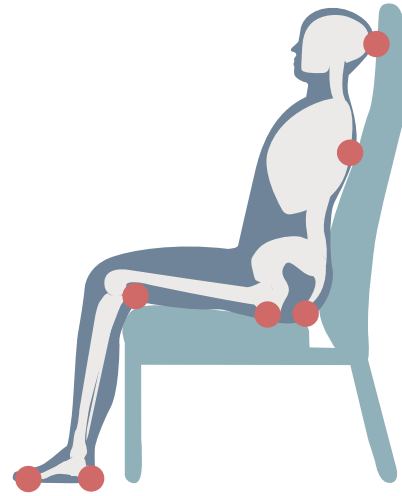

Pressure Care

Pressure Sores - The Issue

A pressure injury is an area of localised damaged skin and underlying tissue caused by pressure (or pressure combined with shear) over prolonged periods.

This pressure restricts blood supply to tissues with resulting shortage of oxygen needed for cellular metabolism to keep tissue alive – “ischemia”.

The most susceptible areas are the skin over any bony prominences such as the sacrum, coccyx, heels or the hips, but other sites such as the spine, shoulders, elbows, knees, ankles, or the back of the cranium are also susceptible.

Holistic Assessment & Treatment

Within the clinical assessment and treatment of pressure sores, a holistic approach is needed combining the following areas of consideration:

PERSON CENTRED ASSESSMENT	RISK ASSESSMENT	TREATMENT
<p>Age</p> <p>Medical history and medications</p> <p>Current health – e.g., neurological conditions with lack of sensation, diabetes, lymphoedema, COPD</p> <p>Haematological assessment</p> <p>Nutrition and hydration</p> <p>Body size and proportions</p> <p>Ability to mobilise/change position</p> <p>Degree of independence</p> <p>Continence</p>	<p>Use of validated scales such as:</p> <ul style="list-style-type: none"> Waterlow Braden Norton <p>Environmental conditions</p> <ul style="list-style-type: none"> Size of room Isolation Temperature Humidity <p>Correct seating size and style e.g. bariatric care</p> <p>Number of hours spent lying and seated</p>	<p>Cleaning and Dressing:</p> <ul style="list-style-type: none"> For stage I sores, gently wash with mild soap and water. For stage II sores, clean with a saltwater (saline) rinse to remove loose, dead tissue. <p>Dressings may include hydrocolloid dressings, foam dressings, or other specialized wound coverings.</p> <p>Preventing infection – antibiotics and antibiotic creams</p> <p>Pressure distributing seating (see page 60) and mattresses</p> <p>Regular, routine repositioning every 15 to 30 minutes</p> <p>Pain management</p> <p>General nutrition</p>

Quick Reference Guide

Please choose from the two pressure relieving seat options below:

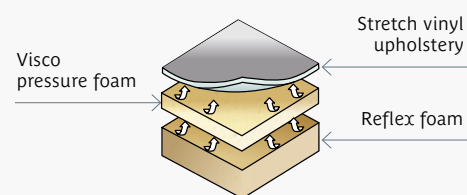

DESCRIPTION OF REQUIREMENT	SOLUTION
<p>Patients with reduced mobility (due to age, accident or illness) who must sit for lengthy periods but can modify their position and stand unaided if they need to.</p> <p>General bariatric care.</p>	<p>BB</p> <p>Medium/High Risk Reflexion® Visco Foam</p> <p>See page 60 for further details</p>
<p>Patients who have some difficulty repositioning themselves independently. They may slump to one side, forward or slide down the chair needing some help from carers to regain a mid-line posture.</p> <p>Patients who have thin or fragile skin and who are a high pressure risk.</p>	<p>CC</p> <p>High Risk Pressure Foam with Gel Insert to enhance performance of the Reflexion foam</p> <p>NB: whilst heat itself may not directly create pressure sores, it may exacerbate the risk factors that lead to their development: Excessive moisture leads to sweating and increased moisture on the skin. Prolonged exposure to moisture raises the risk of pressure sores.</p> <ul style="list-style-type: none"> Heat renders the skin more sensitive and vulnerable to friction and shear. Heat causes blood vessels to dilate resulting in increased blood flow to the skin. This is generally beneficial for wound healing but can be detrimental to pressure sores. Excessive blood flow may further damage already compromised tissue, delaying the healing process. Heat related discomfort may discourage movement and increase risk of pressure on certain areas <p>*Gel keeps the foam cooler longer but will eventually adapt to the temperature of the foam around it.</p> <p>See page 60 for further details</p>

Pressure Care Seating

Integrated pressure care foams contribute to an active pressure ulcer prevention and management strategy, as well as reducing the risk of falls and are used by numerous NHS Trust's and Health Boards as part of their programme.

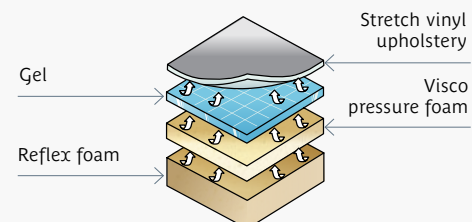

1. Reflexion® Visco Seat (BB)

Medium to high risk Reflexion® Visco pressure foam to facilitate blood circulation and distribute weight evenly.

2. Gel Visco Seat (CC)

High risk Reflexion® Visco pressure foam with the addition of a gel layer, ideal for those seated most of the time.

Dynamic Pressure Cushion

Removable Seat Platform for use with Dynamic Pressure Cushion

Teal offer an interchangeable seat platform option for use with its patient seating ranges.

Dynamic Pressure Cushion

The removable seat platform allows for the safe use of a Dynamic Pressure Cushion in place of the existing seat (without changing the seat height), avoiding the risk of slips and falls by ensuring the seat remains at the correct height for patient use.

The seat platform can then be stored with the Dynamic Pressure Cushion for future use.

Stretch Vinyl Upholstery Options

Pressure Care foams perform best when upholstered with a stretch vinyl which allows maximum movement of the foam.

Inclusive, patient-centred care requires bariatric seating that enhances comfort and posture, supporting patient's Wellbeing. Mobility issues often mean long periods of sitting.

Our bariatric seating combines comfort and safety with an attractive aesthetic and functional design.

Customise from a wide range of upholstery options.

Multiple vinyl / fabric upholstery options & colours available

Bariatric+ Seating

Whittle

Designed to maximise comfort and support, Whittle is a highly durable collection of exceptionally engineered bariatric chairs with integral pressure management. Complements the Teal patient seating range.

Standard Features

- Maximum load up to 245kg (40st) 747/747D. All other models maximum load up to 320kg (50st)
- Ergonomically designed posture back for head / lumbar support
- Pressure foam seat (BB) standard - for use with multi-stretch fabric options
- Large housekeeping wheels
- Sacral gap as standard
- Styled to fit in with our patient seating range

Options

- Removable, depth adjustable seat option (2 positions) for infection management
- Wide range of upholstery finishes (see pages 30-31)
- Wood stain options

Buddy Day Bed

Buddy Day Bed BDBU21 / Day Bed / Attendant Chair

Buddy is designed for relaxation and for family sleepovers in patient rooms. Ideal for maternity, paediatrics and palliative care.

Standard Features

- Stylish contemporary design
- Easy operation
- Extends to 2m bed
- Storage boxes under seat for pillows & blankets, with protective cover
- Space saving
- Fully open head area for clear visibility
- In-line locking front castors. Swivel rear castors for manoeuvrability. Easy push button operation
- Reclines to any angle
- Maximum user weight: 160kg (25st)

Options

- Two width options: standard model and Buddy compact - where room size only permits a small footprint.
- Available in a wide range of fabric and vinyl options (see pages 30-31)

BDBU21 Buddy
Day Bed /
Attendant Chair

OW: 870
SW: 640

BDBU22 Buddy
Compact Day Bed /
Attendant Chair

OW: 730
SW: 500

Buddy features easy push button operation, allowing the back to be lowered or raised. The continuous movement back can be stopped in any position for personalised comfort.

Stylish contemporary design and easy to operate, Buddy extends to a 2-metre bed, with fully open head area and storage compartment with protective cover for pillows, blankets and other accessories.

Moby

Moby Sofa Bed BDM001RH shown with right hand opening

Moby can help make the most of your space. Designed to fit into a patient room and provide a sleepover option when opened, whilst still maintaining a small footprint when closed.

Standard Features

- Stylish contemporary design
- Easy operation
- Extends up to 2m bed
- Storage box under extended side for pillows and blankets, with protective cover
- 65mm Braked Castors

Optional Features

- Available in a wide range of fabric and vinyl options (see pages 30-31)

with Left Hand Front Extending Arm

OW: 1600 - 2350
SW: 1300 - 2000

BDM001RH Moby
Sleepover Sofa Bed
with Right Hand Front Extending Arm

Moby Compact: where room size only permits a small footprint.

BDM002LH Moby Compact
Sleepover Sofa Bed with Left Hand Opening

BDM002RH Moby Compact
Sleepover Sofa Bed with Right Hand Opening

OW: 1540 - 2040
SW: 1500 - 2000

To suit the room layout Moby can be handed with the pull-out section on the left or right hand side.

Removing the back cushions and rolling out the extendible base allows Moby to convert easily into an overnight sleep solution.

Moby is designed with space and style in mind and easily converts into a 2-metre bed, with a practical underbed storage box for pillows and blankets.

Maximum user weight: 160kg (25st).

Moby Curve

Moby Curve BDMC01RH shown with right hand folding drop arm

To suit the room layout Moby Curve can be handed with the drop arm section on the left or right hand side.

BDMC01LH Moby Curve
Sofa Bed with Left Hand Folding Drop Arm

BDMC01RH Moby Curve
Sofa Bed with Right Hand Folding Drop Arm

Contemporary, asymmetrical aesthetic, the Moby Curve sleep solution is designed to fit into patient rooms and provide a sleepover option when opened, maintaining a small footprint

- Standard Features**
- Sofa to Bed; dropping the arm allows the sofa to turn into an extended bed - from 1850mm width to 2050mm width
 - Folding Arm: Arm works on a ratchet mechanism - push to drop, raises in notches
 - Hinged, lifting seat, opens up the storage space under the seat
 - 65mm Braked Castors
 - Wooden Bed Slats

- Optional Features**
- Available in a wide range of fabric and vinyl options (see pages 30-31)

Mandy Sofa Bed

Mandy sofa bed range offers maximum flexibility and is available as a single, double or 3-seater option for staff, visitor and doctor's rooms. Ideal in maternity, paediatric and palliative care areas.

Standard Features

- Contemporary and compact
- Integral sofa bed mechanism
- Extended length 2.2 metres
- Removable Seat
- Fabric mattress (100mm depth)

Optional Features

- Loose cushions
- Waterproof mattress (100mm depth)
- Available in a wide range of fabric and vinyl options (see pages 30-31)
- Wood finish options

A stylish and compact sleepover solution, part of the Mandy soft seating range of sofas and armchairs.

Affiniti

Patient access to storage for valuables and drugs is increasingly important to NHS Trusts who have a responsibility for their safe keeping.

Mobiles, tablets, jewellery etc need lockable facilities and secure compartments are required for patients' home drugs in addition to those prescribed by the hospital. Affiniti provides up to 3 lockable compartments (either digital or barrel lock) to accommodate valuables, patients' home drugs and hospital prescription drugs.

KwickScreen®

Award-winning wipeable dignity screen enables the flexible transformation and division of open plan areas.

Standard Features

- Patented C-Tube technology
- 360° swivel wheels
- Powder coated aluminium body
- Medical grade castors
- Fully encloses for easy storage
- Wipeable and compliant with infection control protocols
- Quickly retracts for emergency access

Flexible

Our hospital screen instantly creates a hygienic patient space, allowing you to respond to changing demands.

Hygienic

Unlike other medical screens, minimal dirt traps and easy-to-clean, wipeable panels, compatible with all standard cleaning products.

Customisable

All our hospital privacy screens can be printed on both sides, offering endless possibilities for custom artwork.

Sustainable

All KwickScreens® provide a more sustainable alternative to disposable and fabric hospital curtains.

KwickScreen® Pro

Flexible and portable hospital screen.

The recliner is the optimal seating option for patients and residents in healthcare environments. Teal's wide range of recliner and riser/recliner models incorporate features and options which maximise the benefits to the user.

Durable and resistant to abrasion, a range of stain resistant, waterproof and anti-microbial contract fabrics are available, including vinyl / faux leather and fabric upholstery options.

Multiple vinyl / fabric upholstery options & colours available
see pages 30-31 for further information

See page 313 for
product dimensions

Patient+ Recliners

Choosing Your Recliner

There are factors to consider when choosing the best recliner for purpose. We offer numerous features and options to optimise the benefits of your new recliner.

Questions to consider:

- Location and access to power.
- Location and available space.
- The room itself? Most riser / recliners need to be positioned a metre away from the wall to function properly and protect the chair back.
- Your user's core strength (to determine whether manual or electric).
- Some manual recliners require some strength and may not be suitable for people with limited mobility or balance issues.
- Do you need a recliner or rise and recliner.
- Tilt in space or independent foot and back action.
- Requirement for Trendelenburg facility (the need to elevate feet higher than the head).
- Bariatric care required.
- Removable arm(s) for easy patient transfer.
- Requirement for healthcare specific upholstery.
- Seating periods? Is pressure distributing foam required.
- Accessories required such as fitted table, USB port, lithium ion battery pack.
- Emergency quick release to aid CPR.
- Seat back style: slim back or fibre back.

When all this has been considered, the aesthetic is important and Teal have a wide selection of finishes.

Use this simple aid to help choose your recliner.

Nevis

Nevis is a manual recliner designed for use in hospital and healthcare environments, maintaining the perfect balance between modern aesthetic and ease of operation, with no compromise on comfort.

Standard Features

- Simple footrest operation using large lever, back operated by the finger pull located on the outside arm, for both carer and patient operation
- Portering handle allows for ease of patient transfer
- Central locking brake system (2 rear wheels) front manual braked castors
- Independent back and footrest movement for personalised comfort
- Soft, adjustable polyurethane headrest (5 x 25mm increments)

- Postural support back with sprung seat for added comfort
- 4 x 100mm heavy duty castors for manoeuvrability (lockable), with 120mm clearance for hoist access
- Easy clean polyurethane arms and headrest for infection control
- Maximum load 220kg (35st/500lbs)

Optional Features

- Anti-pinch seat cover
- Pull out foot tray
- Comprehensive Servicing and Maintenance options

A hybrid recliner, Nevis can accommodate bariatric patients up to 220kg (35st/500lbs) and can also be used as a portering chair for patient transfer.

Avia

The backrest has been thoughtfully designed to follow the natural curvature of the spine, providing full ergonomic support. This design promotes healthy posture for both patients and caregivers, providing deep rest and relieving muscle tension.

MRAV01 Avia
Manual Recliner,
Two Rear 100mm Castors
with Individual Brakes, Rear Handle,
Side Accessory Holder

Extended Length 1470mm

MRAV02 Avia
Manual Portering Recliner,
Four 100mm Castors,
Central Locking Brake System (two rear
wheels), Retractable Footrest, Rear Handle,
Side Accessory Holder

With a blend of comfort and reliability Avia's advanced ergonomics are perfectly tailored to the needs of patients and caregivers. The zero-gravity position promotes even distribution of body weight, enhancing blood circulation, relieving back and limb pressure.

Standard Features

- Telescopic armrest for safe side transfer (access from either side)
- Multi-position backrest - can be automatically locked in any position
- Independent leg rest adjustment promotes blood circulation and muscle relaxation. Legrest operated by side lever, independent of the backrest
- Non-slip retractable footrest (**MRAV02** only)
- Adjustable neck cushion for extra comfort
- Rear manoeuvring handle
- Side accessory holder
- Removable seat for infection control
- Epoxy coated metal components for durability
- Maximum load 150kg (23st)
- Reflexion® BB pressure management seat

Optional Features

- IV Pole with 2 hooks
- Headrest
- Comprehensive Servicing and Maintenance options

Multi-position backrest

Array

In today's fast-paced world multi-use spaces have become common. People work, meet and collaborate all in the same location. Array has been designed with this in mind. Whether you're conferencing or training, Array is adaptable so you can think, learn and work with ease. Array is available in four additional top shapes; Trapezoidal, Crescent, Polygon and Semi-circular. In addition to this, three Quadrants are also available that seamlessly clip onto any rectangular Array mobile tables.

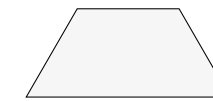

Whatever your requirements Array can easily adapt to your needs.

'C' Leg Configurations:

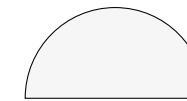

Rectangular

W: 1200 – 1800
D: 600 & 750

Trapezoidal

W: 1500
D: 750

Semi-circular

W: 1500
D: 750

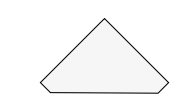

'I' Leg Configurations:

Rectangular

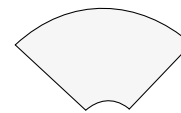

W: 1400 – 2400
D: 750 & 900

Link Top Configurations

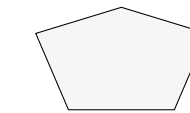

Quadrants (frameless)

Angle: 30°, 45° & 90°
D: 600 & 750mm

Crescent 120°

W: 1700
D: 750

Polygon

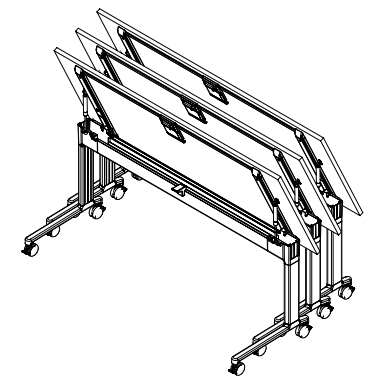

W: 1400 - 1650
D: 600 & 750

H: 740

All measurements in mm

Array allows you to design multiple configurations to create your own individual environment.

The table comprises of 2 end legs, 1 central beam, 2 outriggers and 1 synchronising handle, 25mm thick MFC top.

Flip top for nesting of tables and ease of storage.

Standard Features

- Rigid cast Aluminium frame
- Full integrated cable management
- Fully lockable brake castors
- Nesting capabilities
- Gas assisted lift operation
- Single handle to unlock
- Integrated flexible swipe-in cable risers
- 25mm MFC tops

Optional Features

- Below desk power complete with flip access
- In-surface power unit
- Flip in-surface power unit
- Quadrants
- Modesty panels
- Aluminium cable riser
- Linking

Gas assisted lifting mechanism and the ability to provide on desk or in desk power if required.

Lockers

Teal lockers incorporate a range of unique features that make it one of the most stylish and adaptable lockers available. Manufactured from robust 0.9mm and 0.7mm thick steel.

1-6 door options

Locker columns with flat or sloping tops from one door to 6 doors per column 1800 high (1950 high with sloping tops).

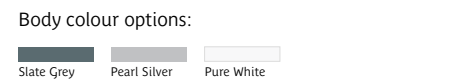

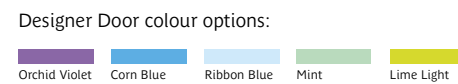

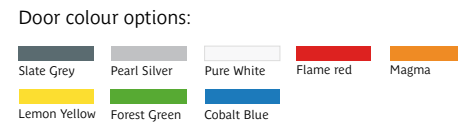

Available In a variety of locker Sizes:

Height: 1800
 300 wide x 930, 380 or 450 deep,
 380 wide x 380 or 450 deep,
 450 wide x 450 deep

Various lock options from Hasp locks for use with personal padlocks, key / cam locks, mechanical and electrical digi code lock options.

Door and body colour options:

Standard Features

- Carbon zero manufacturing
- Doors vented aiding air flow
- Through frame locking
- Flamezero certificated
- Made in Britain
- High quality UK locks
- Fully recyclable
- Robust .9mm & .7mm thick steel
- Covid safe finish - bioshell
- Offset rivets on all products
- Anti-intruder frame
- Tested to BS standards

Specialist Lockers

Specialist wall fixed charging lockers

Size: 300 wide x 300 deep with [8, 10 or 15 compartments] for phones and lap tops, available with individual doors or single doors for fast access.

Vented to prevent build up of heat and available with 240volt, USB-A or USB-c or a combination as well as multiple cable outlet options.

All measurements in mm

Seats & Locker stands

Available with stands, stands with seats or as free-standing cloakroom benches and hangers

In some situations it is a requirement that staff can clean under lockers to prevent a build up of dirt and debris. This can also ease access to the bottom locker compartment. We can supply stands to lift the locker body from floor level. Usually 150mm high and fitted with adjustable feet to counteract uneven floors, these stands can be supplied in multiple locker widths to save cost and make installation easier.

Not all changing rooms have the available space to accommodate separate changing benches. To contend with this, we can supply a combined bench seat and stand. Benches have solid wood slats, can be manufactured in multiple locker widths and have the added benefit of allowing cleaning under the lockers.

Twin Locker

Includes top shelf and two separate hanging compartments each with a coat hook.

Pure Steel Twin Lockers offers two slimline lockers, each with a top shelf and larger hanging area.

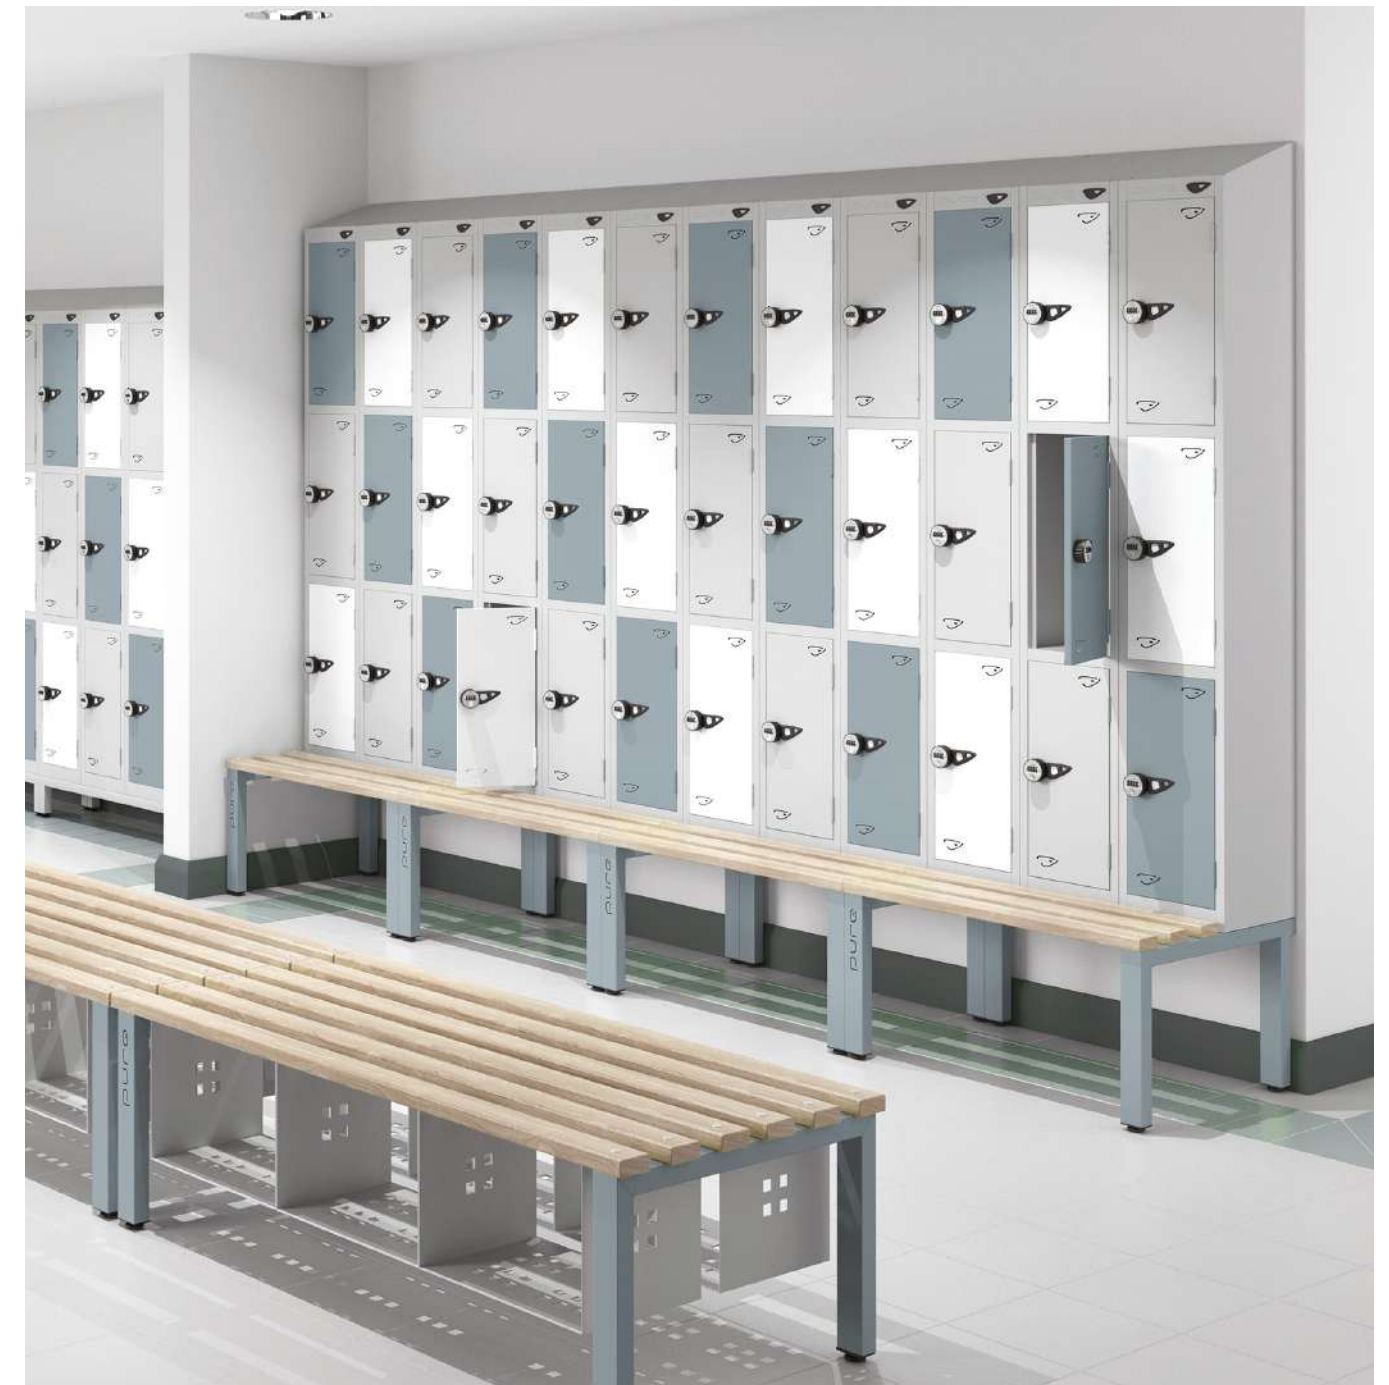

- Features a handy top shelf, ideal for keeping smaller items safely stored as well as a larger compartment for hanging items of clothing
- Ideal for use in a range of environments where you may not have the floorspace for larger individual lockers
- Robust 0.7mm & 0.9mm all steel construction and anti-intruder frame
- Finished with a durable powder coat for ultimate longevity

16 Door Lockers

These personal effects lockers are perfect for offering secure storage for small personal possessions such as garments, wallets, purses, mobile phones & keys.

- Ideal for use in a range of environments where you may not have the floorspace for larger individual lockers
- Robust 0.7mm & 0.9mm all steel construction and anti-intruder frame
- Finished with a durable powder coat for ultimate longevity

Integral sloping tops

Clothing, rubbish and food left on top of lockers can be both a health and fire hazard. Our innovative sloping top design eliminates that unsightly gap at the top of the locker that can allow dirt and bacteria to accumulate. Not only does this design look better but it will be of particular benefit in sterile environments. Retro fit sloping tops also available.

Plastic slope top

Steel slope top

H: 150

Our soft seating collection epitomises comfort and style with contemporary and classic designs to suit any interior space, with detailing options to add a design touch.

Beautiful bedroom furniture is a fundamental element to creating a warm, welcoming space for recuperation, relaxation and sleep.

Teal offer a range of styles: contemporary or traditional, natural wood or painted finishes and a range of flexible configurations that would enhance any bedroom.

As always, an attractive aesthetic is accompanied by focus on ease of access and easy to clean surface materials for effective infection management.
