

TCAR01X, TCAR02X

Designed with challenging environments in mind, Arcus strikes the perfect balance between style and strength, with solid beech underframe and cruciform base for strength, stability and safety.

Standard Features

- Tough, durable 25mm laminate top with smooth arrised edge (chamfer on top and bottom edge)
- Soft radiused corners for added safety
- Easy clean, scratch and heat resistant top
- Solid, 60mm x 30mm beech underframe sections with cruciform base
- Mortise and tenon construction for added strength
- Bolted table-top with security fixings for added safety (covered, non-visible)

Optional Features

- Wood finish options (contrast finishes available)

3 R's

Teal is committed to continually improving the sustainability of all environmental aspects within our business.

To meet both international standards and our own environmental targets we apply the three R's principle

Reduce, Reuse and Recycle.

Whilst recycling is the element which receives the most exposure it is actually the last option available and should never be the prime target in anyone's battle to reduce waste.

It is our duty as individuals and as a company to initially attempt to Reduce usage. Then we should look to Reuse wherever possible and finally, only after these two processes have been exhausted, should we consider Recycling.

Life cycle understanding

Waste elimination
